A Marxist Education Wayne Au, 2018-06-05 *Dialectics of Education* is a rich collection of essays analyzing both the role of education in shaping ideology in the United States and the political implications of struggles for educational justice. This book seeks to recover and reframe the dialectical materialist tradition in critical education studies and carries this tradition forward into theory and practice relevant for today. Building on the tradition of the groundbreaking book *Schooling in Capitalist America* that was first published in 1976, author Wayne Au presents a Marxist perspective on educational policies and pedagogy and highlights the potential for struggle in both the political arena and the classroom. This book is an essential tool in the growing resistance against the privatization of education and for the struggle for educational rights for all students regardless of ethnicity or social status.

Marx and Education Robin Small, 2017-03-02 *Marx and Education* is the first assessment of the educational thought of Karl Marx 1818-1883 and its later influence in the light of developments at the close of the twentieth century. It provides a new perspective in which many aspects of Marx's ideas are seen clearly for the first time freed from misleading associations and outdated prejudices. Marx's thinking on education touches on many still current issues about personal development the nature of learning and the ultimate aims of education as well as the relations between the school and society. Robin Small explores Marx's approach to each of these issues and in relating them to later developments brings the story up to the present day.

Education Against Global Capitalism Paula Allman, 2001-04-30 In today's vernacular Marx outed capitalism well over a century ago but his explanation has been both ignored and misinterpreted by not only his detractors but also by many socialists and even a considerable number of Marxists as well. Today we are experiencing the full impact and suffering the repercussions of capitalism's inherent need to become more than ever before a fully internationalized and integrated system of socio-economic control and domination, the global system that many commentators have suddenly remembered Marx and Engels 1848 presciently forecasted in the Communist Manifesto. When the Berlin Wall fell in 1989 the victory of capitalism and liberal democracy was triumphantly proclaimed. The Cold War was over and we were promised a lasting peace. But as we enter the third millennium we are facing escalating social divisions, injustice and oppression with an environment in varying stages of ecological decay. Daily we are bombarded by the schizoid media images of capitalism's extremes on television: news of the ravaged faces and wasted bodies of some of the thousands suffering famine or the millions living in the world's slums and then the gleaming yet vacuous smile and sumptuously adorned figure of some extravagant wealthy individual who is one of the select members of the global upper class. Are we becoming conditioned to accept such contrasts and regard them as normal and inevitable at a time when we have the potential to eliminate scarcity and eradicate human deprivation? The author argues that critical education is needed to form a movement capable of challenging and then transforming capitalism. She also offers an accessible account of Marx's dialectical critique and exposé of capitalism, clearly demonstrating the real enemy that should be the focus of anti-capitalist and anti-globalization struggles. This is an account that explains why our main focus should not be on greedy individual capitalists or particular multinational corporations or even their handmaiden institutions such as the World Bank, IMF, WTO etc but instead the global network of capitalist social relations and consequent habituated human practices in which we are all involved. These together with the historically specific form of capitalist wealth are the real enemy, the essence of capitalism that must be abolished in order for humanity to have any hope of social and economic justice in the future.

Jones tackles these issues from a variety of angles and perspectives, taking advantage of recent theoretical innovations in Marxist analysis as well as the personal experiences of educational practitioners with Marxist commitments. With a specific focus on pedagogical practices as cultural practices, this book combines detailed case studies of local situations with broad critical overviews of global development and challenges.

Karl Marx Robin Small, 2013-11-30 This book is an introduction to Karl Marx 1818-1883 as a radical educational thinker. Marx's own schooling and education are examined and we see how his interest in educational issues was informed by his own experience. Educational themes in Marx's thinking are identified: the role of education within capitalist society, the contribution of education to human development and the character of education in a future society. These are placed in a historical setting by the author and related to public debates over educational policy.

Throughout his career Marx identified education as key to the prospects of the working class The story of this engagement adds a new dimension to the picture of his work as a philosopher political economist and socialist revolutionary The aspects of education that concerned Marx matched prominent features of his theoretical and political activity and educational themes provided him with a critical application for many of his most important ideas The author explores Marx s work on the British factory school system his use of evidence from the reports of school inspectors and the contemporary movement that led to the establishment of modern systems of public schooling The final chapter relates Marx s thinking to questions about the place of education in today s society showing how relevant it is for the twenty first century These discussions contain new scholarship draw on original sources and are written in a clear and readable style Students in education courses at universities and colleges educational researchers and teachers will find this examination of Karl Marx s ideas concerning education both engaging and enlightening

Knowledge, Ideology and the Politics of Schooling Rachel Sharp,2017-04-28 First published in 1980 this book argues that a theory of ideology is essential to a theory of education It relates developments in the Marxist theory of ideology to the analysis of schooling in a capitalist society Beginning with an appraisal of the early twentieth century liberal social theorists including Weber Durkheim Veblen and Mannheim it demonstrates that the weakness of their approaches arose from a failure to comprehend adequately the nature of capitalism It then outlines the state of the theory of ideology at the time and applies the concept in an analysis of contemporary schooling concluding with a discussion of its political implications The application of the theory of ideology offers important possibilities for a radical socialist strategy on education

Marx, Capital, and Education Curry Malott,Derek Ford,2015 The authors boldly investigate the movement toward communism and the essential role that critical pedagogy can play in this transition Performing a novel and educational reading of Karl Marx and radical theorists and activists Malott and Ford present a critical understanding of the past and present of the underlying logics and often opaque forces that determine the world historical moment

Marxist Perspectives in the Sociology of Education (RLE Edu L Sociology of Education) Maurice Levitas,2012-05-04 The major theories explored are those concerned with social mobility and those which derive from a relativist position in Sociology both of which see education as a selection mechanism for a stratified society Social class family sociolinguistics and schools are among the topics discussed In this analysis the author defines key areas in the sociology of education gives access to important concepts of Marx and Engels strengthens sociological starting points by adding a Marxist element discriminates between radically different directions in education maps the main features of long term working class goals This thoroughgoing Marxist critique of widely prevalent notions in the sociology of education provides a compass by which place and direction in this area of education may be found
