Marxism And Epistemology Bachelard Canguilhem And Foucault:

Marxism and Epistemology Dominique Lecourt, 2017-11-10 When this book was first published in English in 1975 the previous forty years had seen the emergence of a new tradition in the philosophy of the sciences or epistemology in France. The founder of this tradition was Gaston Bachelard. Rather than elaborating from existing philosophy a series of categories to judge science's claims to truth, Bachelard started from the twentieth century revolution in physics and critically examined existing philosophy on the basis of the achievements of this revolution and the scientific practice it exemplified. This critique of philosophy produced an epistemology radically different from traditional idealism and empiricism. Simultaneously it opened the way to a new history of the sciences which had been developed by Georges Canguilhem and Michel Foucault. This critique of empiricism and idealism in the name of science clearly parallels the theses of dialectical materialism. Hence a dialectical materialist analysis illuminates both the achievements and limitations of the tradition. In this book Dominique Lecourt presents an exposition of Bachelard's epistemological writings and then offers a critique of that epistemology and of the works of Canguilhem and Foucault from a Marxist Leninist viewpoint. In an introduction written especially for the English edition he compares Bachelard's positions with those of the different but in some respects analogous Anglo-Saxon traditions in epistemology descending from the works of Karl Popper in particular with Thomas Kuhn's *Structure of Scientific*

Revolutions. **Marxism and Epistemology** Dominique Lecourt, 1975 **Marxism and epistemology** Dominique Lecourt, 1975 **Michel Foucault's Archaeology of Scientific Reason** Gary Gutting, 1989-09-29 An introduction to the critical interpretation of the work of Michael Foucault **Michel Foucault's Archaeology of Western Culture** Pamela Major-Poetzel, 2017-10-10 The author argues that Foucault's archaeology is an attempt to separate historical and philosophical analysis from the evolutionary model of nineteenth century biology and to establish a new form of social thought based on principles similar to field theory in twentieth century physics. She examines Foucault's view of the relationship between power and knowledge and goes on to discuss the new concepts of space-time, subject and causality expressed in relativity theory, quantum mechanics, Saussurean linguistics and Foucault's literary essays. The strong Anglophone interest in historical epistemology since at least the 1990s is typically attributed to its simultaneously philosophical and historical synthetic approach to the study of science. Yet this account, considered by critics to be an unreflective assumption, has prevented historical epistemology from developing a clear understanding and definition, especially regarding how precisely historical and philosophical reflections on the sciences should be combined. Thus this book

uniquely analyses how the problems and tensions inherent to the contemporary phase of historical epistemology can be clarified by reference to the classical French phase. The archaeological method of Michel Foucault which draws on and transforms fundamental insights by Gaston Bachelard and Georges Canguilhem is used to exert an enduring influence on the field especially through the work of Ian Hacking and his philosophical cum historical analyses of styles of scientific reasoning. Though this book is of great value to academic specialists and graduate students the fact it addresses questions broad in scope ensures it is also relevant to a range of scholars in many disciplines and will provoke discussion among those interested in foundational issues in history and philosophy of science. Vagelli's book provides a both unique and uniquely important window into historical epistemology and its relation to contemporary philosophy of science. Unique because nowhere else can one find a single work that treats the range of topics that he covers. Uniquely important because Vagelli's clear concise and comprehensive survey details key interrelationships among a range of American British and European views currently in play regarding historical epistemology and philosophy of science as well as the institutional and intellectual vectors driving their associated epistemological positions. Paul Roth UC Santa Cruz USA. Uneasily the history and philosophy of science have bolstered and undermined each other for all too long. Would history offer nothing but potted episodes to confirm or contradict transhistorical claims about science? Would philosophy dismantle uncritical historicist accounts of scientific discoveries? Historical epistemology offers a more integrated path at once a history of the present and a philosophy of the past. Matteo Vagelli draws together the insights of the Francophone Anglophone and Germanophone traditions to give us a sparkling lucid account of seeing our standards of scientific understanding as developing across time always asking how did we come to our standards of demonstration and argument. Peter Galison Harvard University USA.

Marxism & Scientific Socialism Paul Thomas, 2008-04-24. Providing a vivid intellectual history of Marxist and socialist thought this book explores the development of the idea of scientific socialism through the nineteenth and twentieth century from its origins in Engels to its last manifestation in the work of Althusser.

Marxism and Totality Martin Jay, 1984. Totality has been an abiding concern from the first generation of Western Marxists most notably Lukács, Korsch, Gramsci and Bloch through the second exemplified by the Frankfurt School, Lefebvre, Goldmann, Sartre, Merleau-Ponty and Della Volpe up to the most recent typified by Althusser, Colletti and Habermas. Yet no consensus has been reached concerning the term's multiple meanings expressive, decentered, longitudinal, latitudinal, normative or its implications for other theoretical and practical matters. By closely following the adventures of this troublesome but central concept Marxism Totality offers an unconventional account of the history of Western Marxism.

(Mis)readings of Marx in Continental Philosophy J. Habjan, J. Whyte, 2014-10-14. Misreadings of Marx in Continental Philosophy reflects on the way major European philosophers related to the work of Karl Marx. It brings together leading and emerging critical theorists to address the readings of Marx offered by Benjamin Adorno, Arendt, Althusser, Foucault, Derrida, Deleuze, Negri, Badiou, Agamben, Ranci

Latour and i ek **Mapping the Present** Stuart Elden,2002-01-01 In a late interview Foucault suggested that Heidegger was for him the essential philosopher Taking this claim seriously Mapping the Present assesses the relationship between these two thinkers particularly on the issue of space and history It suggests that space and history need to be rethought and combined as a spatial history rather than as a history of space In other words space should become not merely an object of analysis but a tool of analysis The first half of the book concentrates on Heidegger from the early occlusion of space through the politically charged readings of Nietzsche and Holderlin to the later work on art technology and the polis which accord equal status to issues of spatiality Foucault s work is then rethought in the light of the analysis of Heidegger and the project of a spatial history established through re readings of his works on madness and discipline *Transnational Policing and Sex Trafficking in Southeast Europe* Georgios Papanicolaou,2011-05-03 Mounting a vigorous critique on existing approaches to transnational policing this book lays out an argument situating transnational policing within contemporary transformations of the capitalist state and imperialism looking at the particular case of regional police cooperation against sex trafficking in Southeast Europe *Foucault's Antihumanist Historiography* Joseph Cronin,2001 This study introduces antihumanism as the pivotal element in Foucault s work and reads his work from an Althusserian structural Marxist perspective On Bourdieu, Education and Society Derek Robbins,2006 On Bourdieu Education and Society is a collection of 25 influential articles by Derek Robbins one of Britain s leading scholars on the French sociologist In the first part of the book Robbins s autobiographical introduction describes and contextualizes each of his essays in terms of his own social and political experiences The articles written over three decades explore the meaning of Bourdieu s work assess the significance of his epistemology of the social sciences and views on the trans national transfer of social science concepts and apply Bourdieu s thinking to educational or socio cultural issues and debates An innovative and scholarly study of Pierre Bourdieu the book uses his theories to pose cross cultural questions about their relevance to the analysis of English education and society publisher s website **Shifting Paradigms** Alexander Blum,2016 The publication of Thomas S Kuhn s Structure of Scientific Revolutions in 1962 stands for a turning point in the history and philosophy of science The repercussions of this work have rearticulated the theoretical framework of history and philosophy of science and have also generated discussions that contributed to the formation of the communities of historians as well as philosophers of science in many parts of the world Different approaches to history of science have since emerged and most of them have the Structure as their reference point In October 2012 a conference at the Max Planck Institute for the History of Science brought together some of the historians of science whose work has played a decisive role in the ways history of science has evolved as a field of research in the past 50 years both intellectually and institutionally This volume gathers reflections by many of these historians on the history of the history of science based on the presentations and discussions at the conference The topics covered range from personal recollections of working with Thomas Kuhn to broad overviews of the historical development of the history of

science as a discipline in the past half century The series Proceedings of the Max Planck Research Library for the History and Development of Knowledge presents the results of scientific meetings on current issues and supports further cooperation on these issues via an electronic platform The volumes are available both as print on demand books and as open access publications on the Internet The material is freely accessible online at www.edition-open-access.de
