Marxist Philosophy:

Polemics in Marxist Philosophy George Edward Novack, 1978 Novack defends scientific socialism the generalization of the historic line of march of the working class first advanced by Karl Marx and Frederick Engels He answers those in the twentieth century who parading as the true interpreters of Marx have provided a philosophical veneer for the anti working class political course of Stalinist and social democratic misleaderships around the world

Marxism and Philosophy in the Twentieth Century Richard Hudelson, 1990-09-25 Useful to both students and scholars of the social sciences and humanities this book provides a guide to fundamental issues in twentieth century Marxist thought Outlining the two distinct and incompatible critiques of vulgar Marxism Marxist Leninism and humanistic Marxism that gained prominence in the aftermath of World War I this book presents both an historical overview of these two dominant traditions and a critical analysis of their philosophical roots Challenging the viewpoints of Marxist thought which have prevailed in this century Richard Hudelson argues that the supposed philosophical breakthroughs claimed by both Marxist Leninism and humanistic Marxism rest upon flawed reasoning With a careful critique of these prevailing views he presents his own view which while receptive to the social scientific work of current analytical Marxism de emphasizes the importance of philosophy in the study of Marxism Hudelson contends that developments in contemporary philosophy of science will allow for an appreciation of the scientific Marxism of the Second International without recourse to the philosophical theories of humanistic Marxism and Marxist Leninism Also using some of the more recent developments in the philosophy of science this book makes possible a fruitful exchange between analytical Marxism and Marxist Leninism Divided into three parts the book first presents a historical introduction which identifies positions and arguments of historical significance This is followed by an analytical look at various arguments to determine where the strongest position lies Finally the author offers some concluding remarks on the significance of his analysis for current directions within Marxist philosophy

theories of knowledge *How to Be a Marxist in Philosophy* Louis Althusser, 2017-11-16 In *How to Be a Marxist in Philosophy* one of the most famous Marxist philosophers of the 20th century shares his concept of what it means to function fruitfully as a political thinker within the discipline and environs of philosophy This is the first English translation to Althusser's provocative and often controversial guide to being a true Marxist philosopher Althusser argues that philosophy needs Marxism It can't exist fully without it Similarly Marxism requires the rigour and structures of philosophy to give it form and focus He calls all thinking people to Remember a philosopher is a man who fights in theory and when he understands the reasons for this fight he joined the ranks of the struggle of workers and popular classes In short this book comprises Althusser's elucidation of what praxis means and why it continues to matter With a superb introduction from translator and Althusser archivist G M Goshgarian this is a book that will re-inspire contemporary Marxist thought and reinvigorate our notions of what political activism can be *The History of Philosophy* Alan Woods, Alan Woods outlines the development of philosophy from the ancient Greeks all the way through to Marx and Engels who brought together the best of previous thinking to produce the Marxist philosophical outlook which looks at the real material world not as a static immovable reality but one that is constantly changing and moving according to laws that can be discovered It is this method which allows Marxists to look at how things were how they have become and how they are most likely going to be in the future in a long process which started with the early primitive humans in their struggles for survival through to the emergence of class societies all as part of a process towards greater and greater knowledge of the world we live in This long historical process eventually created the material conditions which allow for an end to class divisions and the flowering of a new society where humans will achieve true freedom where no human will exploit another no human will oppress another Here we see how philosophy becomes an indispensable tool in the struggle for the revolutionary transformation of society **The Philosophy of Marx** William McBride, 2015-04-24 This book first published in 1977 presents for the first time a serious and systematic assessment of Marx primarily as a philosopher It considers all major aspects of Marx's theory its methodology its ontological dimensions its approaches to the descriptions of history and of societies and their economic structures its alleged predictions and its vision of the future as well as some of its intellectual antecedents and twentieth century heirs The presentation of Marx's ideas attempts to be at once faithful to them as distinguished from their reinterpretations by later Marxists and yet novel in form and language From this unique standpoint the book aims to bring the student of philosophy and of political ideas to a closer understanding of the intellectual foundations of Marx's *Capital* and his writings in collaboration with Engels *The Marxist Philosophy of Ernst Bloch* Wayne Hudson, 1982-06-18 *Communism and Philosophy* Maurice Campbell Cornforth, 1980 **Marxism and Philosophy** Karl Korsch, 2014-07-08 In *Marxism and Philosophy* Korsch argues for a reexamination of the relationship between Marxist theory and bourgeois philosophy and insists on the centrality of the Hegelian dialectic and a commitment to revolutionary praxis Although widely attacked in its time *Marxism and Philosophy*

has attained a place among the most important works of twentieth century Marxist theory and continues to merit critical reappraisal from scholars and activists today

The Revolutionary Philosophy of Marxism Karl Marx ,Friedrich Engels ,Alan Woods ,V.I. Lenin ,Leon Trotsky,2018-11-22 A Selection of Writings on Dialectical Materialism by Marx Engels Lenin Trotsky Plekhanov and Luxemburg and Alan Woods Edited by John Peterson with an Introduction by Alan Woods On the bicentennial of his birth Karl Marx s ideas are more relevant than ever While he is perhaps best known for his writings on economics and history anyone who wishes to have a fully rounded understanding of his method must strive to master dialectical materialism which itself resulted from an assiduous study and critique of Hegel Dialectical materialism is the logic of motion development and change By embracing contradiction instead of trying to write it out of reality dialectics allows Marxists to approach processes as they really are not as we would like them to be In this way we can understand and explain the essential class interests at stake in our fight against capitalist exploitation and oppression At every decisive turning point in history scientific socialists must go back to basics Marxist theory represents the synthesized experience historical memory and guide to action of the working class The Revolutionary Philosophy of Marxism aims to arm the new generation of revolutionary socialists with these essential ideas
