It details epidemiology, physiology, pathology, prevention, and management of cardiovascular diseases based on the current scientific understanding of Yoga. Seventy-five experts from four continents, including the most notable names, contributed to this work to create the world's first comprehensive reference literature on Yoga in cardiovascular medicine. The chapters cover information related to Yoga both as prevention and therapy, including coronary artery disease, heart failure, and arrhythmias. In addition, important cardiovascular topics like obesity and diabetes mellitus are also included. A special chapter covers the role of Yoga in the prevention of cardiovascular complications in COVID-19 patients.

The book includes a large and international list of contributors from diverse lineages and backgrounds, such as Matthew Taylor, Gail Parker, and Steffany Moonaz, and is the first resource on yoga therapy that aligns with the educational competencies of the International Association of Yoga Therapists (IAYT). It covers yoga foundations, philosophical background, ayurveda, tantra, biomedical and psychological foundations, yoga therapy tools, and therapeutic skills, yogic and biopsychosocial spiritual assessments, and professional practices. As the field of yoga therapy continues to root and grow, this book is essential for both new yoga therapy practitioners and for schools developing training programs.
