Markets and Market Logic J. Peter Steidlmeier, Kevin Koy, 1986      International Corporations as Actors in Global Governance Maxim Baer, 2012-11-13 Global Governance describes on a normative level how companies can be responsible and sustainable actors in the international sphere In times of globalization failing financial systems and gridlocked political structures these concepts gain critical importance Maxim Baer revisits the discussion leaves the traditional international relations perspective behind and examines leadership strategies of top executives in large companies that enable firms to be part of Global Governance structures A second focus lies on a possible impact of national culture on business leaders and their respective attitude towards elements of Global Governance A German French comparison has been conducted

Globalisms Manfred B. Steger, 2008-12-16 This new edition of Manfred Steger's award winning book explores the three principal ideologies of our time the dominant market globalism based on a neoliberal vision of the world as a single marketplace the justice globalism developed over the last decade by a transnational coalition of global civil society forces and the jihadist globalism of radical Islamists seeking to galvanize their global community of believers into violent action Market globalism has responded to these challengers by turning into imperial globalism a political belief system that marries the capitalist language of the 1990s with the security concerns of our post 9 11 world Steger one of the world's leading scholars on these subjects explores globalization's central questions What exactly are the core claims of these conflicting globalisms How does the imperial globalism of the 2000s differ from the market globalism of the 1990s How has justice globalism managed to mature into a coherent ideology What are the most likely future trajectories of this great ideological struggle of the twenty first century Written with impressive historical and theoretical breadth this groundbreaking work is essential reading for all those concerned with the key questions that our shrinking world must face      *Nurturing Happiness* Robert Wuthnow, Oxford Editor, 2025 How does religious faith contribute to happiness The usual answer is that religious belief relieves the anxieties of ordinary life and that religious belonging provides emotional support But a growing body of literature suggests that happiness is more complicated than that Happiness is not only a feeling It is a practice that we engage in actively that we attempt to manage and that is in many ways managed for us by social norms and institutions In *Nurturing Happiness* Robert Wuthnow develops the concept of emotional practice and locates it in the sociological literature on practice theory He describes how American faith leaders at pivotal moments in their history attempted to nurture and control their adherents thoughts about happiness and their experiences of it He shows how religious authorities used their discursive power to draw moral distinctions among kinds of happiness and their institutional power to manage where it took place and how it was expressed And he demonstrates that religious authorities efforts to nurture happiness while not always effective played a crucial role in faith communities adaptation to changing social conditions This book describes these adaptations in colonial era arguments about heavenly joy and virtuous living nineteenth century revival meetings and festive

events Progressive era advocacy for useful service recent efforts to link play with transcendence and to associate joyful spirituality with personal discipline and current responses to the fallout from illicit pursuits of happiness Nurturing Happiness is required reading for anyone interested in understanding how religious faith relates to happiness *Stock Market Logic* Norman G. Fosback,1976 **Marketization** Himadri Roy Chaudhuri,Russell W. Belk,2020-05-13 This book critically examines marketization a phenomenon by which market processes are institutionalized and marketing increasingly pervades all areas of our everyday life It presents a number of theories frameworks and empirical studies highlighting how the phenomenon of marketization affects the 21st century consumer The book also contests the traditional understanding of markets offering a more comprehensive treatment of marketization and a fresh perspective on the dynamics of markets and the institutions that control everyday consumption practices This book is an ideal resource for academics reflective practitioners and policy makers interested in formulating appropriate change strategies in the face of the globalization that affects emerging markets so profoundly This well crafted research book is a valuable addition to the sparse literature on theories of marketization The authors refigure the existing theories more broadly and present compelling evidence and insights into market phenomenon such as marginality alternative market forms and consumer identity Organizational Experience and Institutional Innovation June-Young Kim,2006 *Stock Market Logic* Norman G. Fosback,1993 Hundreds of priceless investment techniques indicators and ideas by one of America s most prominent investment advisors To Educate a Nation Carl F. Kaestle,Alyssa E. David Hennessey,Jean-Pierre Jeannet,2003-08 Managing large global customers requires special expertise systems and organizational alignment Supported by case studies and interviews this text examines the key aspects of developing and managing global customers for managers operating in multinational companies The Marketization of Nonprofits Sophie

Hersberger-Langloh,2020-12-18 This thesis deals with the concept and consequences of marketization in the nonprofit sector Marketization describes the process of nonprofit organizations becoming more business like and is caused among other things by increased competition for scarce resources the rise of professionalism and calls for more transparency and efficiency by funders and the public Research about marketization is inconclusive some researchers believe marketization can increase not only efficiency but also effectiveness of organizations while others fear that nonprofits lose their focus on a social mission The four articles presented in this thesis focus on the theoretical and practical implications of nonprofits relying more on earned income a dominant feature of marketization and nonprofits actively and passively adopting management practices and tools from the for profit sector another key characteristic of increased marketization The results show that marketization can increase the economic and social performance of an organization and when handled well and implemented through a clear strategic focus foster mission achievement Particularly the focus on beneficiaries and internal processes can help organizations to better fulfill their mission A loss of focus on the mission must be feared if regulatory forces act on the organization without a simultaneous professionalization of management or if an organization focuses too much on its competitors
