changed over the course of the nineteenth century as the frontier between the state and the voluntary sector shifted away from charity towards greater reliance on public finance workers contributions and mutual aid In turn these new sources of assistance enriched civil society encouraging democratization empowerment and social inclusion for previously marginalized members of the community The book opens with an introduction that locates medicine charity and mutual aid within their broad historiographical and urban contexts Twelve archive based inter related chapters follow Their main chronological focus is the nineteenth and early twentieth centuries which witnessed such momentous changes in the attitudes to and allocation of charity and poor relief However individual chapters on the early modern period the eighteenth century and the aftermath of the Second World War provide illuminating context and help ensure that the volume provides a systematic overview of the subject that will be of interest to social urban and medical historians National Library of Medicine
