Mars Effect A French Test Of Over 1000 Sports Champions:

The Matter of Facts Gareth Leng, Rhodri Ivor Leng, 2020-03-18 How biases the desire for a good narrative reliance on citation metrics and other problems undermine confidence in modern science Modern science is built on experimental evidence yet scientists are often very selective in deciding what evidence to use and tend to disagree about how to interpret it In The Matter of Facts Gareth and Rhodri Leng explore how scientists produce and use evidence They do so to contextualize an array of problems confronting modern science that have raised concerns about its reliability the widespread use of inappropriate statistical tests a shortage of replication studies and a bias in both publishing and citing positive results Before these problems can be addressed meaningfully the authors argue we must understand what makes science work and what leads it astray The myth of science is that scientists constantly challenge their own thinking But in reality all scientists are in the business of persuading other scientists of the importance of their own ideas and they do so by combining reason with rhetoric Often they look for evidence that will support their ideas not for evidence that might contradict them often they present evidence in a way that makes it appear to be supportive and often they ignore inconvenient evidence In a series of essays focusing on controversies disputes and discoveries the authors vividly portray science as a human activity driven by passion as well as by reason By analyzing the fluidity of scientific concepts and the dynamic and unpredictable development of scientific fields the authors paint a picture of modern science and the pressures it faces Dreaming the Future Clifford A. Pickover, 2001-03 For countless generations people of every culture have practiced a broad range of dramatic and sometimes frightening techniques to peer into the future In this fascinating book acclaimed author Clifford Pickover presents a nearly exhaustive list of fortune telling techniques from the ominous practice of human sacrifice to reading clues on the Internet Pickover not only explores a vast and colorful array of methods of prediction including dreaming he also evaluates the accuracy of some of the most astonishing prophecies made throughout history Just how accurate were such famous soothsayers as Nostradamus the Delphic Oracle Edgar Cayce the children of Fatima whose third vision has only recently been revealed and dozens more This book takes us one step further by exploring our own inner psyches Why does looking into the future provide a source of solace in a world filled with uncertainty disease and chance And why do the most noted prognosticators so often warn of natural catastrophes of biblical proportions such as earthquakes and floods that will signal the end of the world Through insight and wit Pickover will unlock the door of your imagination with engrossing mysteries intriguing illustrations and even modern patents and computer techniques Also included is a range of practical experiments and recipes from Stone Age to New Age Prepare yourself for a strange but captivating ride **UNDERSTANDING** **SANATAN DHARMA** N.K. TAWAKLEY, 2018-08-21 HOW ACHIEVING VERY HIGH LEVELS OF HUMAN INTELLIGENCE IS POSSIBLE AND HOW THIS CAN BE ACHIEVED Has science grown to the level that it can control Nature Or is Nature all powerful Are horoscopes to be believed in Do Gods exist in the present times and control the world Are soul and

reincarnation just concepts or reality How do sins committed by us corrupt our intelligence How are all the concepts in Sanatan Dharma inter related What is the scientific basis of concepts in Sanatan Dharma Find answers to all these questions Also learn how an average person can improve his intelligence and wisdom by following certain basic concepts and practices in Hindu Religion A step by step guide to expand your wisdom and attain highest levels of intelligence
