**The Mapping of Power in Renaissance Italy** Mark Rosen, 2014-11-28 How did maps of the distant reaches of the world communicate to the public in an era when exploration of those territories was still ongoing and knowledge about them remained incomplete And why did Renaissance rulers frequently commission large scale painted maps of those territories when they knew that they would soon be proven obsolete by newer more accurate information The Mapping of Power in Renaissance Italy addresses these questions by bridging the disciplines of art history and the histories of science cartography and geography to closely examine surviving Italian painted maps that were commissioned during a period better known for its printed maps and atlases Challenging the belief that maps are strictly neutral or technical markers of geographic progress this well illustrated study investigates the symbolic and propagandistic dimensions of these painted maps as products of the competitive and ambitious European court culture that produced them

**Object-Oriented Cartography** Tania Rossetto, 2019-05-16 Object Oriented Cartography provides an innovative perspective on the changing nature of maps and cartographic study Through a

renewed theoretical reading of contemporary cartography this book acknowledges the shifted interest from cartographic representation to mapping practice and proposes an alternative consideration of the thingness of maps Rather than asking how maps map onto reality it explores the possibilities of a speculative realist map theory by bringing cartographic objects to the foreground Through a pragmatic perspective this book focuses on both digital and nondigital maps and establishes an unprecedented dialogue between the field of map studies and object oriented ontology This dialogue is carried out through a series of reflections and case studies involving aesthetics and technology ethnography and image theory and narrative and photography Proposing methods to further develop this kind of cartographic research this book will be invaluable reading for researchers and graduate students in the fields of Cartography and Geohumanities     *The shilling atlas.
