S. Military,Department of Defense (DoD),Barry R. Schneider,U. S. Air Force (USAF),2017-09-11 The Middle East is an international flashpoint a place where open warfare

could erupt at any time It is the home of numerous countries possessing some combination of weapons of mass destruction WMD nuclear biological or chemical weapons and is an area where states are developing an increasing capability to deliver such WMD by missiles and or aircraft The Middle East is also the home of US friends who oppose each other as well as rogue states who are hostile to the United States In short the Middle East is a WMD war waiting to happen Such a conflict would harm US allies and US interests it needs to be avoided Or if WMD warfare occurs such a conflict needs to be limited and the United States and allied forces need to be prepared to cope with the effects The authors of this study address important questions that demand an answer if US national security policy is to be well informed In chapter 1 NBC and Missile Proliferation in the Middle East Dr Lawrence Scheinman director of the Washington D C office of the Monterey Institute of International Studies summarizes the nuclear biological and chemical weapons capabilities and missile systems of Egypt Iran Iraq Israel Libya and Syria He sees the region as one of the most tension ridden conflict prone and heavily armed regions of the world He addresses the questions of what the various state players have why they have it and what this implies for the stability of the region He notes that WMD has already been used repeatedly in the region For example Egypt Syria Iraq and Iran have used chemical weapons against their adversaries Iran and Iraq from 1980 88 engaged in the first two way ballistic missile war in history As the range of delivery systems increases and as warheads are loaded with more lethal payloads the situation will become more threatening should warfare be renewed in the region Scheinman argues that while the United States and its allies need an effective deterrent and defense capability counterproliferation he believes that stability is best served by universal adherence to and compliance with treaties to prevent the proliferation of WMD 1 NBC and Missile Proliferation Issues in the Middle East 2 Recent Military Developments in the Persian Gulf 3 Arab Perspectives on Middle

This book examines the state of the nuclear non proliferation regime and the issues it faces in the early 21st century Despite the fact that most countries in the world have signed the Non Proliferation Treaty NPT there is growing concern that the NPT is in serious trouble and may not be able to stop the further spread of nuclear weapons If so international stability will be undermined with potentially disastrous consequences and the vision of a nuclear weapon free world will become utterly unrealistic More specifically the NPT is exposed to four main challenges explored in this book challenges from outside as three countries that have not signed the Treaty Israel India and Pakistan are known to possess nuclear weapons challenges from within as some countries that have signed on to the Treaty as non nuclear weapons states have nevertheless developed or are suspected to be trying to develop nuclear weapons North Korea and Iran being cases in point challenges from below in the shape of terrorists and other non state actors who may want to acquire radioactive materials or even nuclear weapons and finally challenges from above due to the perceived failure of the five legal nuclear weapons states to keep their part of the double bargain made by the parties of the NPT and take serious steps towards nuclear disarmament This book will be of much interest to students of nuclear proliferation international security war and conflict studies and IR in general Still the Century of Overkill?
