Ontology And Modelling Of Real Estate Transactions:

    The Ontology and Modelling of Real Estate Transactions Erik Stubkjaer,2017-10-24 Due to differences in the legal systems and business environments it is difficult to compare the process of buying and selling land in different European countries Illustrated by a range of European case studies this book identifies and discusses the problems of this and similar comparisons It then examines how ontological modelling can be applied to real estate transactions and advocates this as a basis for comparing the various processes used across Europe The book consists of four parts the economic legal and ontological aspects of real property transactions a discussion of the current situation in different countries thus showing the heterogeneity and complexity of processes that have to be captured whilst the third and fourth parts describe ontological modelling and its benefits for the purpose of understanding the nature of real property transactions together with examples of modelling techniques applied to cadastre and real property   **The Ontology and Modelling of Real Estate Transactions** Heiner Stuckenschmidt,Erik Stubkjær,Christoph Schlieder,2003 Cover Half Title Title Page Copyright Page Table of Contents List of Figures List of Tables List of Contributors Foreword Part I Cadastre Law and Economics 1 Modelling Real Property Transactions 2 Aspects of Real Property Rights and their Alteration 3 Real Estate Foundations of the Ontology of Property Part II Requirements and National Perspectives 4 Purchase of Real Property in Finland 5 Property Transactions in the UK A Situation of Institutional Stability or Technical Change 6 Land Tenure and Real Property Transaction Types in Latvia Part III Ontological Modelling 7 Modelling Real Estate Transactions The Potential Role of Ontologies 8 A Tool Supported Methodology for Ontology Based Knowledge Management 9 Building a Foundation for Ontologies of Organisations Part IV Systems Engineering 10 Conceptual Modelling of Cadastral Information System Structures 11 Ontology Construction for Geographic Data Set Integration Glossary   **Real Property Transactions. Procedures, Transaction Costs and Models** J. Zevenbergen,2008-02-08 Transactions in land and other real property differ between countries throughout Europe The transaction procedures reflect formal rules but they are also normalized through conventions and professional codes of conduct This complex of technical legal and economic issues was investigated from the point of view of transaction economics through an ESF COST supported Action G9 Modeling Real Property Transactions The research was performed between 2001 and 2005 by researchers mainly from university departments related to land surveying real estate management geo information sciences and knowledge engineering This book represents the final outcome of that study A modeling approach was elaborated and tested on a number of countries especially Sweden and Slovenia for which the models are shown in this book in the Unified Modeling Language UML The modeling approach leads to transparency and allows comparison Nevertheless the influence of the national and social contexts and the different perspectives that can be taken prevent a simple ranking of the studied procedures For those planning or comparing transaction procedures or parts thereof the book supplies a tested approach and methodology But the book eventually warns
