*System of Open Spaces* Raquel Tardin, 2012-08-11  
In the current panorama of urban growth and planning in many urban territories of western societies open spaces are residual spaces of urban occupation or are reserved for eventual occupation. Open spaces have been viewed in this manner in the earlier stages of the compact city and especially now in a time of the dispersed territories characterized by discontinuity heterogeneity and fragmentation. The disciplinary perspectives of ecology, geology, landscape architecture and urbanism but also public opinion have for some time promoted the conservation and protection of the most valuable natural spaces and efforts have been made to remove such spaces from the real estate market. However such positions usually radical are insufficient for territorial equilibrium and inevitably lead to the progressive disappearance of valuable natural spaces.

from Open Space Its Use and Preservation The generality of the term assures widespread support for any program labeled  
Open space To many people the term suggests something that is good because of this the idea of preserving Open space has  
broad appeal On the negative side the term is so all encompassing that a general plea to preserve open space may engender  
support from diverse groups having disparate ideas about the use of open space Recreationists farmers and conservationists  
may all want Open space but for different purposes Clashes between such groups may delay or prevent implementation of  
plans for Open space preservation Many laws have been introduced and some enacted by State legislatures study committees  
formed and research papers written on the subject of open space but the term generally is not defined To some people the  
definition hinges on use But even those who agree that use is the major criterion differ about the type of use which may be  
included Some consider large lots around suburban homes to be open space others exclude lawns but include the common  
recreation area of a cluster of houses Some consider farmland as Open space while many others include only parks or  
recreation areas Some consider open space to be either land or water however usually only land is included Some say the  
land must be green while others include stretches of brush or desert and still others include areas of gravel asphalt or
