Nauert,2023-04-21 The essays collected in this volume represent many years of Professor Nauert s research and teaching on the history of Renaissance humanism and more particularly on humanism north of the Alps Much of the early work involved the significant but often overlooked history of humanism at the University of Cologne notoriously the most anti humanist of the German universities Later essays deal with the most famous humanist of

the early sixteenth century Erasmus of Rotterdam and natural philosophy a broad term covering many subjects now associated with natural science is the topic of three of the pieces published here Taken as a whole the book presents a detailed study of intellectual development among European elites *The Bookseller*, 1957 Vols for 1871 76 1913 14 include an extra number The Christmas bookseller separately paged and not included in the consecutive numbering of the regular series British Books in Print, 1970 *The Scientific Enterprise* Edna Ullmann-Margalit, 2012-12-06 The volume before us is the fourth in the series of proceedings of what used to be the Israel Colloquium for the History Philosophy and Sociology of Science This Colloquium has in the meantime been renamed It now bears the name of Yehoshua Bar Hillel 1915 1975 Bar Hillel was an eminent philosopher of science language and cognition as well as a fearless fighter for enlightenment and a passionate teacher who had a durable influence on Israeli philosophical life The essays collected in this volume have of course this much in common that they are all in of and pertaining to science They also share the property of having all been delivered before live and often lively audiences in Jerusalem and in Tel Aviv in the years 1984 1986 As is customary in the volumes of this series the essays and commentaries presented here are intended to strike a rather special balance between the disciplines to which the Colloquium is dedicated The historical and sociological vantage point is addressed in Kramnick's and Mali's treatment of Priestley in Vickers and Feldhay's studies of the Renaissance occult and in Warnke's and Barasch's work on the imagination From a philosophical angle several concepts all material to the methodology of science are taken up rule following by Smart and Margalit analysis by Ackerman explanation by Taylor and the role of mathematics in physics by Levy Leblond and Pitowsky The Reference Catalogue of Current Literature, **The British National Bibliography Cumulated Subject Catalogue**, 1955 In Search of Meaning and Coherence Wolff-Michael Roth, 2019-02-18 In the course of his research career much of which was based in his own classrooms Wolff Michael Roth explored numerous new theoretical frameworks when the old ones proved to be unable to account for the data In this book surrounding 11 of his publications spanning 20 years of work the author tells a story of how science education research concretely realized and singularized itself That is rather than taking sole credit for the work that ultimately came to bear his name Roth develops a historical narrative in which his work came to realize cultural historical possibilities inherent in the field of science education But perhaps because some types of this work came to be realized for a first time Roth's research also came to be characterized by others in the community as cutting edge This work therefore presents as much an auto biographical narrative as it presents a cultural historical recollection of science education as it unfolded over the past two decades
