Occupied Reading Alan A. Block, 2023-05-31 Today's growing national concern about education centers on the paramount importance of teaching reading and writing. This volume offers a rigorous examination of reading and the pedagogy of reading critically. The book examines the crucial role of reading in the education of the child for the year 2000 and explores the history of reading and readers in America while surveying the attendant literacy debates. The author examines the historical progress of American reading instruction demonstrating that how one is taught to read not only determines what one will read but also what is permissible to read and how pedagogies of reading define reading publics. An important chapter focuses on reading as a process of identity construction that creates not only a text but shapes the person who reads that text. The book also describes reading as a psychological process in which the creative act of manipulating the text produces the self and the world. A final chapter discusses reading as the center of the educational system and examines methodologies. An index is provided.

Autonomous Robot Vehicles Ingemar J. Cox, Gordon T. Wilfong, 2012-12-06
Autonomous robot vehicles are vehicles capable of intelligent motion and action without requiring either a guide or teleoperator control. The recent surge of interest in this subject will grow even further as their potential applications increase. Autonomous vehicles are currently being studied for use as reconnaissance, exploratory vehicles for planetary exploration, undersea land and air environments, remote repair and maintenance, material handling systems for offices and factories, and even intelligent wheelchairs for the disabled. This reference is the first to deal directly with the unique and fundamental problems and recent progress associated with autonomous vehicles. The editors have assembled and combined significant material from a multitude of sources and in effect now conveniently provide a coherent organization to a previously scattered and ill-defined field.
