Dystopias and Utopias on Earth and Beyond Douglas A. Vakoch, 2021-04-29

Caught as we are in a grave climate crisis that seems more irreversible with every passing year, our literary portrayals of the future often feature the dystopian collapse of the world as we know it. Science fiction explores how we got here while pointing toward a more hopeful path forward. From an ecofeminist perspective, a core cause of our current ecological catastrophe is the patriarchal domination of nature playing out in parallel with the oppression of women. As an alternative to dystopian futures that seem increasingly inevitable, ecofeminist science fiction helps us conjure utopias that promote environmental sustainability based on more egalitarian human relationships. Dystopias and Utopias on Earth and Beyond: Feminist Ecocriticism of Science Fiction explores the fictional worlds of such canonical novelists as Margaret Atwood, Octavia Butler, Ursula K. Le Guin, Doris Lessing and Joan Slonczewski, as well as those of lesser known science fiction writers, as they collectively probe humanity's greatest existential threats. Contributors from five continents provide compelling analyses of far future dystopias on Earth that are all too easy to imagine becoming reality if humankind's current trajectory continues, as well as provocative insights into science fiction utopias set on idyllic planets orbiting distant stars, which offer liberatory alternatives that might someday be actualized in the real world. By examining the links between the destruction of the environment and the domination of women, Dystopias and Utopias on Earth and Beyond provides the tools to counteract those intertwined oppressions, helping create a foundation for a truly habitable world.

Science Fiction and Indian Women Writers Urvashi Kuhad, 2021-07-29

Science fiction as a literature of fantasy goes beyond the mundane to ask the question: what if the world were different from the way it is? It often challenges the real, builds on imagination, places no limits on human capacities and encourages readers to think outside their social and cultural conditioning. This book presents a systematic study of Indian women's science fiction. It offers a critical analysis of the works of four female Indian writers of science fiction: Rokeya Sakhawat Hossain, Manjula Padmanabhan, Priya Sarukkai Chabria and Vandana Singh. The author considers not only the evolution of science fiction writing in India but also discusses the use of innovations and unique themes, including science fiction in different Indian languages, the literary, political and educational activism of the women writers, and eco feminism and the idea of cloning in writing, to argue that this genre could be viewed as a vibrant representation of freedom of expression and radical literature. This groundbreaking volume will be useful for scholars and researchers of English literature. It will also prove a very useful source for further studies into Indian literature, science and

Science Fiction Robert Scholes,Eric S. Rabkin,1977 This is both an introduction to an overwhelming popular literary
genre and a stimulating analysis of its literary social and scientific elements Contains detailed discussions of the most
significant writers and of ten representative novels from 1818 to 1976 **The Criticism behind Gattaca's Genetic
Apartheid Scenario** Myriam Nickels,2017-06-28 Seminar paper from the year 2016 in the subject English Language and
Literature Studies Other grade 1 3 University of Koblenz Landau Anglistik language English abstract The new advances and
tendencies in the application of genetic science evoke ethical social and legal concerns as the immense progress in genetics
is a double edged sword On the one hand the completion of the Human Genome Project at the beginning of the 21st century
and the recent progress in genetics come along with obvious benefits in genomic medicine such as better diagnosis of
diseases and gene therapy However on the other hand the new genetics bring along worries that the new genetics could lead
to a society that is less tolerant of disability and genetic diversity Moreover after successfully having intervened in the
transformation of animals and plants to humans like humans are now on the verge of manipulating the human genome so
as to perfect the human species possibly since the necessary genetic technology is now available The movie Gattaca builds
upon the scientific and technological advances in genetics in the late 20th century and displays a dystopian not too distant
future In the portrayed future excessive genetic screening and embryo manipulation have brought about a rigidly
hierarchical society grounded on genetic discrimination Undeniably there is an insurmountable social gap between these two
classes Gattaca thoughtfully portrays the lives of different people trapped in these social categories and the special burdens
they have to bear in such a society which is obsessed with genetic perfection A distinct two tiered society structure is the
result of liberal eugenic practices and the unquestioned belief in genes being the determinants of an individual's life Niccol
constructs a profoundly dystopian future which results from the utopian quest to eradicate imperfections in society and
genetically perfect humankind As Nicolas Pethes postulates science fiction possesses the possibility to prearrange real

science and to picture outcomes that have not yet happened 177 and to articulate the current cultural image of science 169 Hence I read Gattaca as a genetic apartheid scenario to show how it comments on the advance in genetics in a critical way It is not possible to dismiss that the visions of the dystopian movie can be easily tied in with the contemporary genetic advances of our society and the hereby evoked ethical social and legal controversies and obstacles
