

**Messerschmitt Bf 109**

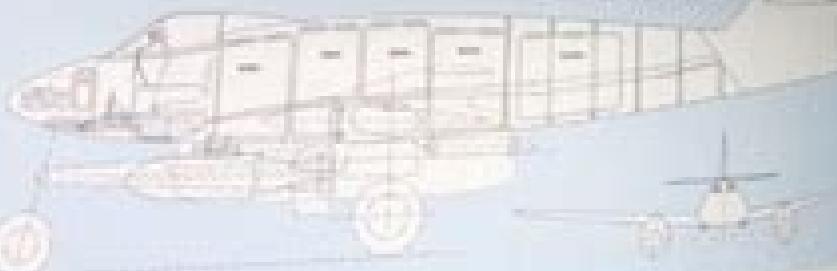

In 1935 designs were called in from several aircraft manufacturers and the one selected was submitted to the ministry of the armament and defence ministries for further evaluation. The results of this evaluation encouraged Messerschmitt to build 1000 early flight test aircraft and 1000 first production aircraft, with trials on the first production aircraft starting in 1936. When the *Bf 109* first flew in the summer of 1935, it was clear to the ministry of armament that Messerschmitt had created an excellent aircraft with an exceptional performance and manoeuvrability. It was the first aircraft to be accepted by the ministry of armament and was designated *Bf 109* fighter aircraft with the camouflage code 'Yellow 109'.

## Me 262 Volume One:

**Secret Projects of the Luftwaffe - Vol 1 - Jet Fighters 1939 -1945** Dan Sharp, 2020-09-22 Germany's air ministry was quick to grasp the potential of the jet engine as early as 1938 and by 1939 several German aircraft manufacturers were already working on fighter designs that would utilize this new form of propulsion. Rocket engines too were seen as the way of the future and companies were commissioned to design fighters around them. As the Second World War began the urgent need to bring these advanced new types into production saw a host of innovative aircraft designs being produced which would eventually result in Messerschmitt's Me 262 jet fighter and the Me 163 rocket propelled interceptor. And as the war progressed efforts were increasingly made to find better ways of utilizing jet, rocket and latterly ramjet engines in fighter aircraft. Aviation companies from across Germany set their finest minds to the task and produced some of the most radical aircraft designs the world had ever seen. They proposed rotating wing ramjet fighters, arrowhead shaped rammers, rocket firing bat winged gun platforms, sleek speed machines, tailless flying wings, tiny mini fighters and a host of others ranging from deadly looking advanced fighters to downright dangerous vertical launch interceptors. *Secret Projects of the Luftwaffe Volume 1 Jet Fighters 1939-1945* by Dan Sharp based on original research using German wartime documents offers the most complete and authoritative account yet of these fascinating designs through previously unseen photographs, illustrations and period documentation from archives around the world. *Messerschmitt Me 262* Walter J. Boyne, 1997 *Messerschmitt Me 262 Arrow to the Future* tells the dramatic story of the Me 262's combat career as a fascinating chain of events in which planning, luck and even blind stupidity played important roles. Even by today's engineering standards, magnificent is the only word to describe the effort to bring the plane's jet engines which eclipsed the performance of all contemporary aircraft from the laboratory to production in an amazingly short time. *Arrow to the Future* also tells the story of the people who flew the Me 262 in combat. Their complete accounts bring their missions to life and set the plane in the historical context of the war. The German narratives are complemented by the accounts of Americans who flew against the Me 262 for instance the team of crack USAAF pilots known as Watson's Whizzers who literally stole a fleet of jet aircraft from German airfields at the end of the war. Also described are the postwar efforts to test and preserve the Me 262. Included is a description of the efforts to obtain one of these aircraft for display at the National Air and Space Museum and the painstaking efforts by the team at the Smithsonian's Paul E. Garber Facility for Preservation, Restoration and Storage to restore the Me 262 to its pristine condition. This new reprint edition is lavishly illustrated with more than 100 photographs including operational photos from World War II, color views of the cockpit and interior and exterior shots of the restored Me 262. In addition to the striking photographs there are expert technical drawings, cutaway illustrations and equipment and conversion tables. Walter J. Boyne is the author of many books including *The Smithsonian Book of Flight*, *The Leading Edge*, *Boeing B-52*, *A Documentary History* and *Phantom in Combat* as well as the novels *The Wild Blue*, *Trophy for Eagles* and *Air Force Eagles*. [Modelling Luftwaffe Jets and](#)

Wonder Weapons Brett Green,2012-11-20 A detailed guide to modelling the Luftwaffe jets and rocket planes that saw service at the end of World War II While the Allies largely relied on mass production to help them win World War II Germany put a great deal of their limited resources into new technologies and wonder weapons In addition to these tangible assets which were used with varying degrees of success the drawing boards of Germany were littered with dozens of advanced designs that never reached the prototype or production stages With this Masterclass you can learn how to model the Luftwaffe's jet arsenal and secret weapons of fact and fiction
