Meaning In The Visual Arts:

Meaning in the Visual Arts Erwin Panofsky, 1993 Since its original publication Erwin Panofsky's *Meaning in the Visual Arts* has been standard reading for students of art history. It is both an introduction to the study of art and for those with more specialized interests a profound discussion of art and life in the Middle Ages and Renaissance. Panofsky's historical technique reveals an abundance of detail; detail he skillfully relates to the life and work of individual painters and their times. The papers in this volume represent a cross section of Panofsky's major work. Included are selections from his well-known *Studies in Iconology* and *The Life and Art of Albrecht Durer* plus an introduction and an epilogue. *The History of Art as a Humanistic Discipline* and *Three Decades of Art History in the United States: Impressions of a Transplanted European* as well as pieces written especially for this collection. All display Panofsky's vast erudition and deep commitment to a humanistic conception of art and art history.

Erwin Panofsky's *Meaning in the Visual Arts* is considered a key work in art history. Its ideas have provoked widespread debate and although it was first published more than sixty years ago it continues to feature regularly on numerous university reading lists. *Meaning in the Visual Arts* comprises nine essays. In these Panofsky argues for the independence of iconology as a branch of history. He moves on to demonstrate the anatomy of art and its study as well as the controlling principles of interpretation. He then deals with the theories of human proportions, Gothic architecture and the Northern Renaissance. Finally Panofsky discusses his own American experiences.

An Introduction to Iconography Roelof van Straten, 1994 Available for the first time in English. *An Introduction to Iconography* explains the ways that artists use references and allusions to create meaning. The book presents the historical theoretical and practical aspects of iconography and ICONCLASS the comprehensive iconographical indexing system developed by Henri van de Waal. It gives particular emphasis to the history of iconography, personification, allegory and symbols and the literary sources that inform iconographic readings and includes annotated bibliographies of books and journal articles from around the world that are associated with iconographic research. The author of numerous articles and a four volume reference work on Italian prints, Roelof van Straten is currently working on an iconographic index covering the prints of Goltzius and his school.
