Measure Of Islands:

Space, Time, and Stuff Frank Arntzenius,Cian Seán Dorr,2012-01-19 Frank Arntzenius presents a series of radical ideas about the structure of space and time and establishes a new metaphysical position which holds that the fundamental structure of the physical world is purely geometrical structure He argues that we should broaden our conceptual horizons and accept that spaces other than spacetime may exist **Comprehensive Plan Report on the Mississippi Coastal Improvements Program (MsCIP), Part 1 of 3, House Document 111-95, January 26, 2010, 111-2 ,2010 Guide to Effective Monitoring of Aquatic and Riparian Resources ,2004** This monitoring plan for aquatic and riparian resources was developed in response to monitoring needs addressed in the Biological Opinions for bull trout U S Department of the Interior Fish and Wildlife Service 1998 and steelhead U S Department of Commerce National Marine Fisheries Service It provides a consistent framework for implementing the effectiveness monitoring of aquatic and riparian resources within the range of the Pacific Anadromous Fish Strategy PACFISH and the Inland Fish Strategy INFISH The primary objective is to evaluate the effect of land management activities on aquatic and riparian communities at multiple scales and to determine whether PACFISH INFISH management practices are effective in maintaining or improving the structure and function of riparian and aquatic conditions at both the landscape and watershed scales on Federal lands throughout the upper Columbia River Basin A list of attributes thought to be important in defining aquatic and riparian habitat conditions and their relationship with listed species were identified The list of attributes was then translated into measurable criteria and compiled to form sampling protocols for both stream channel parameters Part II and vegetation parameters Part III These sampling methods were tested for variability and the results are documented in two other publications Testing Common Stream Sampling Methods for Broad Scale Long Term Monitoring Archer and others 2004 and The Repeatability of Riparian Vegetation Sampling Methods How Useful Are These Techniques for Broad Scale Monitoring Coles Ritchie and others in preparation

Promoting K-12 Civic Learning and Engagement Through Assessment

Laura S. Hamilton, Samuel H. Rikoon, David Kidd, 2026-01-22

Promoting K-12 Civic Learning and Engagement Through Assessment is a comprehensive guide to the assessment of civic learning in primary and secondary education contexts. Today's schools have a responsibility to teach learners how to critically evaluate information, understand the rights and responsibilities of citizenship, and engage with people whose perspectives and experiences differ from their own. This book provides a vision for testing, measurement, and assessment efforts that support this broad vision of high quality civic learning for all students. The first section sets the stage for the rest of the volume by exploring historical, conceptual, and technological foundations of civic learning and assessment. The second section explores approaches to monitoring school based civic learning opportunities and outcomes at the system level. It examines necessary innovations in large scale assessment in order to generate high quality data on a range of civic opportunities and outcomes. The third and final section presents work on assessment tools and strategies that directly support educators, students, and communities in cultivating meaningful civic engagement. Scholars, teaching faculty, and graduate students of educational measurement, leadership, and policy in addition to professionals in the assessment development field and other nonprofits who are invested in fostering civic competencies among learners will find an innovative resource to inform their work.
