Canal Discharge

Measurements with Radioisotopes J. C. Schuster,1964 Half capacity tests in Feb 1962 and full capacity tests in June 1963 using Gold 198 were made in a straight section of a concrete lined irrigation canal with a design discharge of 620 cfs The pulse or total count radioisotope method was used for 65 discharge measurements Consistency of the radioisotope method was evaluated by using up to 4 portable Geiger counting systems Conclusions were 1 With adequate mixing of radioisotope and canal water accuracy of 97% or greater is possible when compared with current meter discharge measurements 2 In a canal with hydraulic characteristics similar to the one tested a 2 500 to 3 000 ft mixing length is needed for 98 to 99% mixing 3 Minimum mixing length may be computed for similar straight canals using a diffusion coefficient and time factor developed from these tests 4 Simultaneous multiple injections of tracer will provide higher probability of uniform mixing in shorter lengths than will single injections and also result in higher diffusion coefficients 5 With sufficient data from canals of various sizes mixing length equations can probably be derived for canals having a minimum of turbulence

Radioisotope Gauges for Industrial Process Measurements Geir Anton Johansen,Peter Jackson,2004-10-22 In order to fully utilise nucleonic

measurement principles and their applications it is important to have an understanding of the underlying physics

and highlights their application to a variety of problems Contains an overview of electronics measurement accuracy safety and standards Considers processes and demands design strategies and practical realisation of measurement systems Provides many practical engineering examples Offering a comprehensive coverage of engineering applications this book is an essential tool for electrical electronic and instrument engineers in the oil and chemicals processing sectors It is also a valuable reference to graduate students and physicists involved in nuclear radiation measurement medical applications radiochemical research environmental monitoring and chemical engineering Radioactivity and Its Measurement W. B. Mann, R. L. Ayres, S. B. Garfinkel, 2016-12-15 Begins with a description of the discovery of radioactivity and the historic research of such pioneers as the Curies and Rutherford After a discussion of the interactions of and rays with matter the energetics of the different modes of nuclear disintegration are considered in relation to the Einstein mass energy relationship as applied to radioactive transformations Radiation detectors and radioactivity measurements are also discussed
