The action is passed through each player until it reaches the last one who runs the course, passes the finish line, and then runs to tell the game leader the message. The first team, or the most accurate action, wins. Some members may need to run around the course twice to even out team numbers.

The TEACHING PROFESSION will always be of beyond comparison for no other profession could be possibly equalise it. It is INCOMPARABLE.

Before a person enters the said profession, it will require him/her to possess all the good qualities a human must have. It may sound crazy for it's just an easy thing to visualize the best man you can be in anyways, but the real is the otherwise. To be good is easy to think, but hard to practise.

If ever you already entered this profession, then that's the only time you might understand.

To be a teacher is to have these qualities: skills in communication, listening, collaboration, adaptability, empathy and patience.

And, it may sound cliché, but the hardest to learn and attain from the above mentioned is to maintain **PATIENCE** specifically if the teacher is facing some personal problems that somehow affect his/her attitude towards the students and other related works.

In this present time of pandemic, parents can actually relate to this. Having patience is the hardest to attain which can be proved by some posts on social media.

However, everyone can actually eliminate this (especially by today's teachers-PARENTS) by simply putting yourself in place of your student. Imagine that you are that person!
