Hurst** Charles Chamberlain Hurst,1933 **Creative Evolution** Henri Bergson,Arthur Mitchell,2014-04 Creative Evolution An Alternate Explanation for Darwin s Mechanism of Evolution By Henri Bergson Translated by Arthur Mitchell Creative Evolution is a 1907 book by French philosopher Henri Bergson Its English translation appeared in 1911 The book provides an alternate explanation for Darwin s mechanism of evolution suggesting that evolution is motivated by an elan vital a vital impetus that can also be understood as humanity s natural creative impulse The book was very popular in the early decades of the twentieth century before the Neodarwinian synthesis was developed The book also develops concepts of time offered in Bergson s earlier work which significantly influenced modernist writers and thinkers such as Marcel Proust For example Bergson s term duration refers to a more individual subjective experience of time as opposed to mathematical objectively measurable clock time In Creative Evolution Bergson suggests that the experience of time as duration can best be understood through creative intuition not through intellect Harvard philosopher William James intended to write the introduction to the English translation of the book but died in 1910 prior to its completion [The Mechanism of creative evolution](#) Charles Chamberlain Hurst,1932 **Creative Evolution** Henri Bergson,2022-12-01 First published in French in 1907 Henri Bergson s Evolution creative is a scintillating and radical work by one of the great French philosophers of the nineteenth and twentieth centuries This outstanding new translation the first for over a hundred years brings one of Bergson s most important and ambitious works to a new generation of readers A sympathetic though critical reader of Darwin Bergson argues in Creative Evolution against a mechanistic reductionist view of evolution For Bergson all life emerges from a creative shared impulse which he famously terms elan vital and which passes like a current through different organisms and generations over time Whilst this impulse remains as forms of life diverge and multiply human life is characterized by a distinctive form of consciousness or intellect Yet as Bergson brilliantly shows the intellect s fragmentary and action oriented nature which he likens to the cinematograph means it alone cannot grasp nature s creativity and invention over time A major task of Creative Evolution is to reconcile these two elements For Bergson the answer famously lies in intuition which brings instinct and intellect together and takes us into the very interior of life A work of great rigour and imaginative richness that contributed to Bergson winning the Nobel Prize for Literature in 1927 Creative Evolution played an important and controversial role in the trajectory of twentieth

century philosophy and continues to create significant discussion and debate The philosopher and psychologist William James who admired Bergson's work was writing an introduction to the first English translation of the book before his death in 1910 This new translation includes a foreword by Elizabeth Grosz and a helpful translator's introduction by Donald Landes Also translated for the first time are additional notes articles reviews and letters on the reception of Creative Evolution in biology mathematics and theology This edition includes fascinating commentaries by philosophers Maurice Merleau Ponty Georges Canguilhem and Gilles Deleuze *Creative evolution* Henri Bergson,1911 **Creative Evolution** Henri Bergson,2025-02-17 Creative Evolution by Henri Bergson embarks on a profound exploration of life's evolutionary journey challenging traditional mechanistic and teleological views Bergson's work translated with the assistance of William James aims not to be a definitive philosophical system but rather a method inviting collective effort and progressive thought The book is structured to first examine the shortcomings of existing frameworks then to trace the divergent paths of evolution to grasp the essence of life's movement and finally to consider how our understanding might transcend its limitations

**Creative Evolution** Henri Bergson,Arther Mitchell,2010-10 Creative Evolution is a 1907 book by French philosopher Henri Bergson Its English translation appeared in 1911 The book provides an alternate explanation for Darwin's mechanism of evolution suggesting that evolution is motivated by an *elan vital* a vital impetus that can also be understood as humanity's natural creative impulse The book was very popular in the early decades of the twentieth century before the Neodarwinian synthesis was developed The book also develops concepts of time offered in Bergson's earlier work which significantly influenced modernist writers and thinkers such as Marcel Proust For example Bergson's term *duration* refers to a more individual subjective experience of time as opposed to mathematical objectively measurable clock time In Creative Evolution Bergson suggests that the experience of time as duration can best be understood through creative intuition not through intellect **Creative Evolution** Henri Bergson,2015-05-22 The history of the evolution of life incomplete as it yet is already reveals to us how the intellect has been formed by an uninterrupted progress along a line which ascends through the vertebrate series up to man It shows us in the faculty of understanding an appendage of the faculty of acting a more and more precise more and more complex and supple adaptation of the consciousness of living beings to the conditions of existence that are made for them **Creative Evolution** Henri Bergson,2015-12-28 Creative Evolution By Henri Bergson Translated by Arthur Mitchell The history of the evolution of life incomplete as it yet is already reveals to us how the intellect has been formed by an uninterrupted progress along a line which ascends through the vertebrate series up to man It shows us in the faculty of understanding an appendage of the faculty of acting a more and more precise more and more complex and supple adaptation of the consciousness of living beings to the conditions of existence that are made for them Hence should result this consequence that our intellect in the narrow sense of the word is intended to secure the perfect fitting of our body to its environment to represent the relations of external things among themselves in short to think matter Such will

indeed be one of the conclusions of the present essay We shall see that the human intellect feels at home among inanimate objects more especially among solids where our action finds its fulcrum and our industry its tools that our concepts have been formed on the model of solids that our logic is pre eminently the logic of solids that consequently our intellect triumphs in geometry wherein is revealed the kinship of logical thought with unorganized matter and where the intellect has only to follow its natural movement after the lightest possible contact with experience in order to go from discovery to discovery sure that experience is following behind it and will justify it invariably Creative Evolution French L Evolution creatrice is a 1907 book by French philosopher Henri Bergson Its English translation appeared in 1911 The book provides an alternate explanation for Darwin s mechanism of evolution suggesting that evolution is motivated by an lan vital a vital impetus that can also be understood as humanity s natural creative impulse The book was very popular in the early decades of the twentieth century before the Neodarwinian synthesis was developed The book also develops concepts of time offered in Bergson s earlier work which significantly influenced modernist writers and thinkers such as Marcel Proust For example Bergson s term duration refers to a more individual subjective experience of time as opposed to mathematical objectively measurable clock time In Creative Evolution Bergson suggests that the experience of time as duration can best be understood through creative intuition not through intellect Harvard philosopher William James intended to write the introduction to the English translation of the book but died in 1910 prior to its completion *The Hibbert Journal* Lawrence Pearsall Jacks, George Dawes Hicks, George Stephens Spinks, Lancelot Austin Garrard, 1912 A quarterly review of religion theology and philosophy *The Crowning Phase of the Critical Philosophy* Robert Alexander Cameron Macmillan, 1912

*Creative Evolution - Henry Bergson* Henri Bergson, 2024-04-11 Winner of the 1927 Nobel Prize Henri Louis Bergson 1859 1941 was born in Paris France and emerged as one of the greatest French thinkers at the turn of the 20th century He was a writer academic philosopher and the originator of what came to be called process philosophy Creative Evolution is Henri Bergson s greatest work In it the author demonstrates himself to be most clearly a philosopher of the process as well as showing the influence of biology on his thought This essay represented a break from the main philosophical currents of the late 19th century Bergson s scientific and literary contributions were liberating and his influence in the early 20th century was of great importance to his contemporaries and future generations Although he took science very seriously there was still room in Bergson s universe for intuition morality and religion as well as for the mechanics of things Henri Bergson was a talented philosopher and writer who built a bridge between literature philosophy and science hence receiving a well deserved Nobel Prize in Literature **The Making of the Modern Mind** John Herman Randall, 1926 [The Monist](#) Paul Carus, 1917 Vols 2 and 5 include appendices **Mechanisms of Character Formation** William Alanson White, 1916 **The Journal of the American Osteopathic Association** , 1912
