War Department, 1961      **Engineers' Reference and Logistical Data** United States. Department of the Army, 1971      *Mechanized Combat* Chris Bishop, 1998 Each tank featured is illustrated with a full color annotated artwork plus color and black and white pictures and text that describes the vehicle s development features and service record      The Defense of Hill 781 James R. McDonough, 1993-06-01 Brilliant hardhitting description of modern war on the U S Army s premier training ground A must read tactical primer for today s warrior John C Doc Bahnsen Brigadier General USA Ret At the turn of the century a small humorous book on tactics was published The Defense of Duffer s Drift quickly became a bestseller and today is still widely read The Defense of Hill 781 is a modern version of this classic a tactical primer with ample funpoking but with serious lessons to be learned Lt Col A Tack Always Finds himself in the California high desert alone disheveled confused A guide soon appears to inform him of his situation He has died and is now in Purgatory his humility in the Army was somewhat lacking where he must atone for past sins Purgatory is aptly the U S Army s National Training Center NTC and Lt Col Always may earn his way out by completing a successful mission Through a series of six missions the reader plans and fights with Lt Col Always making the split second decisions that determine victory or defeat life or death Through successive difficulties some important lessons are burned into the commander s brain lessons about tactics about people about what it takes to fight a winning battle Like Duffer s Drift this book is a valuable resource for all military tacticians For the armchair general it is a fascinating look at how the members of a military unit work together in combat

Glantz, 1998 Drawing on evidence never before seen in the West including combat records of early engagements David Glantz claims that in 1941 the Red Army was poorly trained inadequately equipped ineptly organized and consequently incapable of engaging in large scale military campaigns and both Hitler and Stalin knew it He provides a complete and convincing study of why the Soviets almost lost the war that summer dispelling many of the myths about the Red Army that have persisted since the war and soundly refuting Viktor Suvorov s controversial thesis that Stalin was planning a preemptive strike against Germany      Combined Arms Warfare in the Twentieth Century Jonathan Mallory House, 2001 For centuries the world has witnessed the development and use of increasingly complex and powerful military systems and technologies In the process the art of war has truly become the art of combined arms warfare in which infantry artillery air support intelligence and other key elements are all coordinated for maximum effect Nowhere has this trend been more visible than in the history of twentieth century warfare Originally

published as an essential in house study for U S Army officers during the 1980s this much revised and expanded edition remains the most complete study available on the subject Rewritten with a much wider readership in mind it both retains its enormous practical utility for military professionals and provides a valuable and appealing introduction for scholars and general readers Jonathan House author of the original work brings the story of combined arms up to the present covering among other things Desert Storm the war in Chechnya and the rise of smart weapons and related technologies He traces the evolution of tactics weapons and organization in five major militaries American British German Russian and French over 100 years of warfare Revealing both continuities and contrasts within and between these fighting forces he also provides illuminating glimpses of Israeli and Japanese contributions to combined arms doctrine Expanding his insightful analysis of the world wars and the wars in Korea and Vietnam House also offers much new material focused on the post Vietnam period Throughout he analyzes such issues as command and control problems of highly centralized organizations the development of special operations forces advances in weapons technology including ballistic and anti ballistic missile systems the trade offs involved in using heavy versus light armed forces and the enduring obstacles to effective cooperation between air and land forces His strong critique of the air superiority propaganda that came out of the Gulf War is sure to spark some heated debates Rigorously comparative House s study addresses significant questions about how nations prepare for war learn or don t learn its harsh lessons and adapt to changing times and technologies Unique in the annals of the literature on warfare it will be the standard work on this subject for a long time to come
