Medical Devices for Pharmacy and Other Healthcare Professions Ahmed Ibrahim Fathelrahman, Mohamed Izham
Mohamed Ibrahim, Albert I. Wertheimer, 2021-12-29 Today more than ever the pharmacist is a full member of the health team and many of the pharmacist's patients are using a host of other devices from various specialty areas of medicine and surgery. *Medical Devices for Pharmacy and Other Healthcare Professions* presents a comprehensive review of most devices that pharmacists and pharmacy personnel encounter during practice. The devices covered are relevant to pharmacists working in various work settings from hospitals, community pharmacies, and health insurance sector to regulatory bodies, academia, and research institutes. Even if a pharmacist does not come across each of these devices on a regular basis, the book is a valuable reference source for those occasions when information is needed by a practitioner and for instructing interns and residents. The book discusses devices needed for special pharmaceutical services and purposes such as residential care homes and primary care based with GPs, pharmacy based smoking cessation services, pharmacy based anticoagulant services, pain management, and terminal care, medication adherence, and automation in hospital pharmacy. Additional features include: Provides information on devices regarding theory, indications, and procedures concerning use, cautions, and place in therapy. Assists pharmacists in understanding medical devices and instructing patients with the use of these devices. Focuses on providing the available evidence on effectiveness and cost effectiveness of devices and the latest information in the particular field. Other healthcare providers interested in medical devices or involved in patients' care where medical devices represent part of the provided care would benefit from the book. **Healthcare Simulation and Online Learning** Zaleha Abdullah Mahdy, Michelle A. Kelly, Ismail Mohd Saiboon, Dinker R. Pai, 2022-07-05 *Social Media for Medical Professionals* David R. Stukus, Michael D. Patrick, Kathryn E. Nuss, 2019-05-23 Medical professionals are increasingly engaging with social media in an effort to provide credible evidence-based information and combat the misinformation that patients are finding online and bringing to office visits. Medical professionals are uniquely poised to recognize the harm that can come from applying the incorrect information to decisions affecting one's health while they are also able to serve as valued and knowledgeable experts online and engage with patients and the public to provide accurate up-to-date information. *Social Media for Medical Professionals: Strategies for Successfully Engaging in an Online World* is a unique first of its kind resource providing specific social media strategies for engagement as well as advice regarding best practices for professionals to maintain at all times. Chapters discuss many aspects pertaining to social media covering the basics, researching and assessing credible medical information online, and best practices for discussing myths and misconceptions with patients. Later chapters cover the benefits of engaging in social media as a medical professional, strategies for increasing engagement and building an audience, various options and platforms for content creation, and finding your niche. Dos's and don'ts regarding patient privacy and strategies for dealing with negative comments online. A uniquely practical resource. *Social Media for Medical Professionals*

Exploring the Interaction between Health-promoting and Health Risk Behaviours in Health Huixuan Zhou, Feng Jiang, Yi-lang Tang, 2024-05-28 Health related behaviours play positive or negative roles in people's health For instance health risk behaviours such as sedentary behaviours e.g binge watching TV and playing computer games the use of alcohol tobacco or other substances and lack of sleep have been found to negatively affect the physical and mental health of people On the other hand some studies show that health promoting behaviours such as physical activity and healthy dietary habits can mitigate or reverse the negative effects of health risk behaviours on health outcomes In the meantime some studies indicate that the harmful effects of some health risk behaviours may not be mitigated by health promoting behaviours For instance some studies show that sedentary behaviours and physical activity are independently associated with some physical and mental health outcomes interventions to increase physical activity with and without decreasing sedentary time lead to

different health outcomes Clearly more research is needed to show the interaction between health promoting behaviours and health risk behaviours in health which could shed light on the management of health related behaviours *Lifestyle*
