Media Hoaxes:

Media Hoaxes Fred Fedler, 1989 Journalists have created thousands of hoaxes just for the fun of it. Most of the hoaxes appeared during the 1800s. Fedler brings back some of the hoaxes perpetrated by the media on the media and on the public. Some of the hoaxes continued for weeks, exciting or frightening millions of readers or listeners and fooled everyone even supposed experts. Journalists were not well educated and were encouraged to undertake hoaxes by a new group of publishers often called press barons. Readers were unsophisticated and poorly educated, hence easier to fool. However, Fedler feels the media, their reporters, publishers and the public have become more respectable and responsible during the past 50 years.

Journalism permeates our lives and shapes our thoughts in ways we've long taken for granted. Whether we listen to

National Public Radio in the morning, view the lead story on the Today show, read the morning newspaper headlines, stay up

to the minute with Internet news, browse grocery store tabloids, receive Time magazine in our mailbox or watch the nightly

news on television, journalism pervades our daily activities. The six volume Encyclopedia of Journalism covers all significant

dimensions of journalism, including print, broadcast and Internet journalism, U.S. and international perspectives, history,

technology, legal issues and court cases, ownership and economics. The set contains more than 350 signed entries under the

direction of leading journalism scholar Christopher H. Sterling of The George Washington University. In the A to Z volumes 1

through 4, both scholars and journalists contribute articles that span the field's wide spectrum of topics, from design, editing,

advertising and marketing to libel, censorship, First Amendment rights and bias to digital manipulation, media hoaxes, political

cartoonists and secrecy and leaks. Also covered are recently emerging media such as podcasting, blogs and chat rooms. The

Last two volumes contain a thorough listing of journalism awards and prizes, a lengthy section on journalism freedom around

the world, an annotated bibliography and key documents. The latter, edited by Glenn Lewis of CUNY Graduate School of

Journalism and York College, CUNY, comprises dozens of primary documents involving codes of ethics, media and the law, and

future changes in store for journalism education. Key Themes: Consumers and Audiences, Criticism and Education, Economics,

Ethnic and Minority Journalism, Issues and Controversies, Journalist Organizations, Journalists, Law and Policy, Magazine Types,

Motion Pictures, Networks, News Agencies and Services, News Categories, News Media, U.S. News Media, World Newspaper

Types, News Program Types, Online Journalism, Political Communications, Processes and Routines of Journalism, Radio and

Hoaxes, Myths, and Manias Robert E. Bartholomew,Benjamin Radford,2003 Thinking is an innate ability that most people take for granted But like writing well or speaking effectively before the public thinking well is a skill that can be learned and improved with practice In this unique introduction to critical thinking Robert Bartholomew and Benjamin Radford first lay out the principles of critical thinking and then invite readers to put these principles to the test by examining a series of unusual and challenging case studies Assembling a wide range of bizarre but actual incidents from many cultures and various time periods they demonstrate how the tools of critical thinking can help to unravel alleged paranormal events and seemingly mysterious behavior What factors led to the Martian panic of 1938 Why did many people conclude that an alien spaceship crashed in Roswell New Mexico in 1947 How do we explain the panic expressed by otherwise normal Southeast Asian men who came to believe that a contagious disease was causing their genitals to shrink or the frenzied dance manias that captivated thousands of Europeans during the Middle Ages Bartholomew and Radford show that reality is very much a social construction that cultural assumptions play a large part in our judgments about what is normal and what is deviant and that the use of critical reasoning is our best means of ensuring an objective perspective Sins Against Science Lynda Walsh,2006-09-08 Recounts the fake news stories written from 1830 to 1880 about scientific and technological discoveries and the effect these hoaxes had on readers and their trust in science **Presstime** ,1992 *The Skeptical Inquirer* ,1998
