Monkey Painting:

Monkey Painting Thierry Lenain, 1997 Towards the end of the 1950s biologists investigating the question of how art originated came up with the idea of getting monkeys to paint pictures Drawing on a large body of historical and scientific evidence this fascinating book sets out a new interpretation of quasi artistic behavior in monkeys showing that there may be a fine line between it and true art Lenain cannot help let slip an infectious fascination with our primate cousins he succeeds in making his book unputdownable The London Magazine *Zen Paintings in Edo Japan (1600-1868)* Galit Aviman, 2017-07-05 In Zen Buddhism the concept of freedom is of profound importance And yet until now there has been no in depth study of the manifestation of this liberated attitude in the lives and artwork of Edo period Zen monk painters This book explores the playfulness and free spirited attitude reflected in the artwork of two prominent Japanese Zen monk painters Hakuin Ekaku 1685 1768 and Sengai Gibon 1750 1837 The free attitude emanating from their paintings is one of the qualities which distinguish Edo period Zen paintings from those of earlier periods These paintings are part of a Zen ink painting tradition that began following the importation of Zen Buddhism from China at the beginning of the Kamakura period 1185 1333 In this study Aviman elaborates on the nature of this particular artistic expression and identifies its sources focusing on the lives of the monk painters and their artwork The author applies a multifaceted approach combining a holistic analysis of the paintings i e as interrelated combination of text and image with a contextualization of the works within the specific historical art historical cultural social and political environments in which they were created **The Monkey in Art** Ptolemy Tompkins, 1994 This delightful and engaging book travels around the world and throughout history from ancient Egypt to eighteenth century France and beyond to tell the story of the monkey s role in art By turns amusing and serious the text and pictures provide a fascinating glimpse into the unlikely ways in which human beings have chosen to view their simian relatives over the centuries **Enlightened Animals in Eighteenth-Century Art** Sarah Cohen, 2021-02-11 How do our senses help us to understand the world This question which preoccupied Enlightenment thinkers also emerged as a key theme in depictions of animals in eighteenth century art This book examines the ways in which painters such as Chardin as well as sculptors porcelain modelers and other decorative designers portrayed animals as sensing subjects who physically confirmed the value of material experience The sensual style known today as the Rococo encouraged the proliferation of animals as exemplars of empirical inquiry ranging from the popular subject of the monkey artist to the alchemical wonders of the life sized porcelain animals created for the Saxon court Examining writings on sensory knowledge by La Mettrie Condillac Diderot and other philosophers side by side with depictions of the animal in art Cohen argues that artists promoted the animal as a sensory subject while also validating the material basis of their own professional practice **Wattana** Chris Herzfeld, 2016-05-02 She likes tea sews draws on papers and is a self taught master of tying and untying knots But she is not a crafty woman of the DIY set she is Wattana an orangutan who lives in the Jardin des Plantes Zoo in Paris And it is in Paris

where Chris Herzfeld first encounters and becomes impressed by Wattana and her exceptional abilities with knots In Wattana An Orangutan in Paris Herzfeld tells not only Wattana s fascinating story but also the story of orangutans and other primates including bonobos chimpanzees and gorillas in captivity Offering a uniquely intimate look at the daily lives of captive great apes Herzfeld uses Wattana s life to trace the history of orangutans from their first arrival in Europe in 1776 to the inhabitants of the Zoo of Paris and other zoos today She provides a close look at the habits technical know how and skills of Wattana who remarkably uses strings paper rolls rope and even pieces of wood to make things And she thoughtfully explores how apes individually and often with ingenuity come to terms with and adapt to their captive environments and caretakers Through these stories Wattana sympathetically reveals the extraordinary psychology and distinctive personalities of great apes as well as the interconnections between animal and human lives especially in zoos Scientists predict that orangutans will disappear from the wild by 2030 and captive animals like Wattana may as a result provide our best chance to understand and appreciate their astonishing intelligence and abilities Wattana the accomplished maker of knots is the hero of this poignant book which will enthrall anyone curious about the lives of our primate cousins
