*The International Standard Bible Encyclopaedia* James Orr, 1929

*Sea Monsters* Charles River Editors, 2017-03-14 Includes pictures Includes accounts of legendary sea monsters Includes online resources and a bibliography for further reading

The oceans of the world have always had an air of mystery About 71% of the Earth s surface is covered by water and until the 20th century no one had plumbed its depths Even today the bigger seas and oceans remain a largely unexplored frontier with new species being discovered every year Thus it comes as no surprise that countless legends have arisen of strange creatures lurking in the depths What follows is just a sampling of these stories including sightings of unusual sea creatures by experienced witnesses in the 19th 20th and even 21st centuries The idea that there might be large species still swimming in the oceans that haven t been classified by marine biologists isn t as far fetched as it might sound For example the megamouth shark *Megachasma pelagios* was entirely unknown to science until a U S Naval vessel off the coast of Hawaii accidentally skewered one on its anchor The megamouth shark is a deepwater shark that can reach up to 18 feet in length making it quite a large creature to go unnoticed for so long In fact since its accidental discovery fewer than a hundred specimens have been spotted and the species had only been filmed three times The Peruvian beaked whale *Mesoplodon peruvians* was discovered the same year and not formally described until 1991 Very little is known about this small species of whale that has only been seen off the west coast of Central and South America Even more poorly known is the Spade toothed whale *Mesoplodon traversii* which was first documented in 1872 thanks to the discovery of a partial jaw in New Zealand It wasn t recognized as a distinct species until a partial skull was found in 1986 and no complete body was found until two specimens washed ashore in New Zealand in 2010 The fact that an entire species of whale is known to exist and yet no one has ever seen one alive adds fuel to the imagination of any monster hunter who insists that there may be even more intriguing unknown species waiting to be discovered Cryptzoology is the science that investigates these creatures which investigators generally call cryptids The word is made up of the Greek stem *kryptos* hidden and suffix zoology study of

animals thus cryptozoology is the study of hidden as yet undiscovered animals Cryptozoologists are quick to point out that they are not searching for alien beings or occult creatures they do not hunt UFOs or ghosts They are serious scientists some amateur and some with professional degrees who want to find study and protect these rare species Sea Monsters A History of Creatures from the Haunted Deep in Legend and Lore profiles the various sea creatures that people have told tales about for centuries from ancient sources and doubtful legends to sightings by more reliable witnesses such as ship s captains and naturalists Along with pictures of important people places and events you will learn about legendary sea monsters like never before

*Monsters of the Sea* Barbara Lindsay,1973     **Sea Monster!** Jordan Quinn,2014-06-10 When a legendary sea monster starts making waves in the Sea of Wrenly Prince Lucas and his friend Clara travel to the Island of Primlox seeking information that might help them calm the beast     *Monster Sea Creatures* Diana Zourelias,2012-04-18 Thirty close up illustrations will put colorists face to face with some of the ocean s most frightfully fascinating inhabitants Realistically detailed images range from a wobbegong and goblin shark to a blobfish and sea lamprey Each full page rendering features a brief caption and black and white full body thumbnails of all these underwater creatures appear on the inside front cover
