Morning Of The Magicians

Louis Pauwels

Morning Of The Magicians:

The Morning of the Magicians Louis Pauwels, Jacques Bergier, Rollo Hugh Myers, 1971 It is not science fiction although it cites myths on which that literary form has fed Nor is it a collection of bizarre facts though the Angel of the Bizarre might well find himself at home in it It is not a scientific contribution a vehicle for an exotic teaching a testament a document a fable It is simply an account at times figurative at times factual of a first excursion into some as yet scarcely explored realms of consciousness The Morning of the Magicians is a classic of radical literature a book that has challenged assumptions and conventional knowledge for decades It has shaken the foundations of beliefs all over the world and may be the most influential book published in the twentieth century Louis Pauwels and Jacques Bergier spent years searching through all the regions of consciousness to the frontiers of science and tradition and opened their minds to any fact or theory that went beyond the frontier of current theories The result is this work and the stream of possibilities that it contains Do mutants exist are they a future form of man Does extrasensory perception reveal that human consciousness has advanced beyond its currently accepted limits What connects the ancient art of alchemy and modern atomic physics
