Morphological Productivity:

Morphological Productivity Laurie Bauer, 2001-05-28 Why are there more English words ending in *-ness* than ending in *-ity*? What is it about some endings that makes them more widely usable than others? Can we measure the differences in the facility with which the various affixes are used? Does the difference in facility reflect a difference in the way we treat words containing these affixes in the brain? These are the questions examined in this book. Morphological productivity has over the centuries been a major factor in providing the huge vocabulary of English and remains one of the most contested areas in the study of word formation and structure. This book takes an eclectic approach to the topic, applying the findings for morphology to syntax and phonology. Bringing together the results of twenty years work in the field, it provides new insights and considers a wide range of linguistic and psycholinguistic evidence.

Morphological Productivity Ingo Plag, 2012-10-25 The future of English linguistics as envisaged by the editors of *Topics in English Linguistics* lies in empirical studies which integrate work in English linguistics into general and theoretical linguistics on the one hand and comparative linguistics on the other. The *TiEL* series features volumes that present interesting new data and analyses and above all fresh approaches that contribute to the overall aim of the series which is to further outstanding research in English linguistics.

Morphological Productivity Laurie Bauer, 2001-05-28 This book deals with the problems surrounding the phenomenon of apparently variable productivity in morphology.

Dynamics of Morphological Productivity Francesco Gardani, 2013-05-30 In *Dynamics of Morphological Productivity* Francesco Gardani explores the evolution of the productivity of the noun inflectional classes of Latin and Old Italian covering a span of almost 2 000 years, an absolute novelty for the theory of diachrony and for Latin and Italo Romance linguistics. By providing an original set of criteria for measuring productivity based on the investigation of loanword integration, conversions and class shift, Gardani provides a substantial contribution to the theory of inflection as well as to the study of the morphological integration of loanwords. The result is a wealth of empirical facts including data from the contact languages Etruscan, Ancient Greek, Germanic, Arabic, Byzantine Greek, Old French and Provençal, accompanied by brilliant and groundbreaking analyses.

Productivity in English Word-formation Jesús Fernández Domínguez, 2009 This book is a contribution to the study of morphological productivity that is the property of word formation processes whereby new words are created to satisfy a naming need. It presents an up to date picture of this phenomenon, characterising its major attributes and addressing neighbouring theoretical concepts like availability, profitability or lexicalisation. Links are also established between those notions and N N compounding, a word formation process regarded as very productive but traditionally overlooked in studies of this type. Unlike other productivity surveys mostly directed at affixation, a corpus of N N compounds is here compiled to which the mainstream models of productivity are applied. This allows to detect the pros and cons of those proposals and to propose a model of productivity. Two measures, Indicator of Profitability and Trend of Profitability, are introduced which can be applied across word formation processes and are able to

compute their productivity based on semantic categories Measuring Productivity in Word Formation Shmuel Bolozky, 2017-07-03 Morphological productivity is the likelihood of a morphological pattern being used or comprehended in new word formation Three methods of measuring productivity of word formation are proposed productivity tests open ended and judgment tasks dictionary comparison newer with older dictionaries supplements with earlier versions and the ratio of hapax legomena to tokens in corpora Processes which score highly by all three criteria can safely be regarded as productive The model is examined in light of data from Israeli Hebrew which as a Semitic language offers a rich array of discontinuous and linear derivation patterns The Hebrew data also support the claims that in essence lexical formation is semantically based that it is constrained by a requirement for distinctiveness and that it may vary significantly with the type of derivation base *Construction Grammar and its Application to English* Martin Hilpert, 2014-03-17 Construction Grammar explains how knowledge of language is organized in speakers minds The central and radical claim of Construction Grammar is that linguistic knowledge can be fully described as knowledge of constructions which are defined as symbolic Morphology: Morphology: its relation to semantics and the lexicon Francis Katamba, 2004 This six volume collection draws together the most significant contributions to morphological theory and analysis which all serious students of morphology should be aware of By comparing the stances taken by the different schools about the important issues the reader will be able to judge the merits of each with the benefit of evidence rather than prejudice Morphological Productivity Mark Aronoff, Livio Gaeta, 2003 **On the paradigmatic dimension of morphological creativity** Jaap van Marle, 2017-03-06 No detailed description available for On the paradigmatic dimension of morphological creativity Understanding Words and Morphology Gauraang Asan, 2025-01-03 Understanding Words and Morphology offers a comprehensive introduction to the study of how words are constructed Designed for undergraduates with limited background in linguistics this book explores morphological approaches within linguistic theory over the past two decades We cover mainstream generative linguistics including Chomsky's lexicalist morphology phonology inspired developments and syntactically oriented approaches from the 1980s as well as lesser known European theories We identify and critically examine the issues each approach addresses assessing their effectiveness Our book provides valuable insights for both students and practicing linguists such as syntacticians phonologists and other specialists who need a formal overview of related branches of linguistic theory We include data from a wide variety of languages encouraging scholars to gather and analyze their own data This book covers essential topics such as internal word structure derivation compounding inflection morphological typology productivity and the interface of morphology with syntax and phonology We anticipate and address the question Is it a real word by examining the distinction between dictionaries and the internal lexicon Yearbook of Morphology 1991 G.E. Booij, Jaap van Marle, 2012-12-06 MARK ARONOFF The articles included in this section represent recent research on morphological classes which has been independently performed by a number of investigators This work was presented at a symposium that was

organized as part of the 1990 1991 annual meeting of the Linguistic Society of America in Chicago in January 1991 Our aim in presenting this work is twofold on the one hand we would like to encourage others interested in morphology to pursue the types of research that we present This is especially important in the study of morphological classes which while they are widespread among the languages of the world are also highly diverse and often quite complex On the other hand we hope to convince researchers in adjacent areas to provide a place for autonomous morphology in their general picture of the workings of language and to pay closer attention to the intricacies of the interaction between morphology and these areas

Expanding the Lexicon Sabine Arndt-Lappe, Angelika Braun, Claudine Moulin, Esme Winter-Froemel, 2018-01-22 The creation of new lexical units and patterns has been studied in different research frameworks focusing on either system internal or system external aspects from which no comprehensive view has emerged The volume aims to fill this gap by studying dynamic processes in the lexicon understood in a wide sense as not being necessarily limited to the word level by bringing together approaches directed to morphological productivity as well as approaches analyzing general types of lexical innovation and the role of discourse related factors The papers deal with ongoing changes as well as with historical processes of change in different languages and reflect on patterns and specific subtypes of lexical innovation as well as on their external conditions and the speakers motivations for innovating Moreover the diffusion and conventionalization of innovations will be addressed In this way the volume contributes to understanding the complex interplay of structural cognitive and functional factors in the lexicon as a highly dynamic domain

The Effects of Morphological Productivity on Word Recognition Zuzanna Przewłoka, 2015 As readers writers speakers and listeners we come across newly formed words on a regular basis throughout our lives Often we have not heard these words and they cannot be found in dictionaries Because we understand the meaning

of different morphemes word parts and how they can be put together to form complex words we are able to understand these novel words and infer their meaning How is it that we can see or hear words previously unknown to us and infer their meaning with relative ease Past research e g Hay Baayen 2001 has suggested that multi morphemic words can be recognized via decomposition by being broken down into their morphemic components or via their full word form The route taken during recognition can be affected by a multitude of factors including a concept known as morphological productivity Schreuder Frauenfelder 1991 Being a measure of an affix s likelihood to create new words productivity may be used to explain novel word recognition By using the masked priming paradigm and EEG measures to compare the recognition of productively and unproductively suffixed words this study showed N400 effects for productively suffixed words which argues that decomposition takes place during recognition of these words The N400 effect suggests the presence of decomposition during recognition of productively suffixed words which implies that novel words are likely recognized via decomposition **1988** Geert Booij,Jaap van Marle,2020-10-26 No detailed description available for 1988 **Yearbook of Morphology 2001** Geert Booij,Jaap van Marle,2002-09-30 The Yearbook of Morphology 2001 focuses on the notion of productivity the role of analogy in coining new words and constraints on affix ordering in a number of Germanic languages are investigated Other topics include the necessity and the role of the paradigm in morphological analyses the relation between form and meaning in morphology the accessibility of the internal morphological structure of complex words and the interaction of morphology and prosody in truncation processes **The Multilingual Origins of Standard English** Laura Wright,2020-09-07 Textbooks inform readers that the precursor of Standard English was supposedly an East or Central Midlands variety which became adopted in London that monolingual fifteenth century English manuscripts fall into internally cohesive Types and that the fourth Type dating after 1435 and labelled Chancery Standard provided the mechanism by which this supposedly Midlands variety spread out from London This set of explanations is challenged by taking a multilingual perspective examining Anglo Norman French Medieval Latin and mixed language contexts as well as monolingual English ones By analysing local and legal documents mercantile accounts personal letters and journals medical and religious prose multiply copied works and the output of individual scribes standardisation is shown to have been preceded by supralocalisation rather than imposed top down as a single entity by governmental authority Linguistic features examined include syntax morphology vocabulary spelling letter graphs abbreviations and suspensions social context and discourse norms pragmatics registers text types communities of practice social networks and the multilingual backdrop which was influenced by shifting socioeconomic trends *A Corpus-based Approach to Morphological Productivity* Harald Baayen,1989 *Testing Morphological Productivity* Mark Aronoff,Roger Schvaneveldt,1978
