

# English Syntax

## The Different Types of Syntax

### Generative syntax

how sentences are generated by the human brain

### Transformational syntax

how sentences can be transformed into different forms while still retaining their meaning

### Descriptive syntax

how language is actually used in practice, rather than how it "should" be used according to prescriptive rules

### Comparative syntax

how different languages use syntax to convey meaning

## English Syntax Rules

### Subject-verb agreement

The subject and verb in a sentence must agree in number (i.e. singular or plural)

### Word order

English sentences generally follow a subject-verb-object (SVO) order

### Use of articles and prepositions

English uses articles (a, an, the) and prepositions (in, on, at, etc.) to convey specific meanings and relationships between words

### Punctuation

The use of punctuation marks like commas, periods, and semicolons helps to clarify the meaning and structure of a sentence

## **Morphologydriven Syntax:**

**Morphology-driven Syntax** Bernhard Wolfgang Rohrbacher, 1999 This book argues that syntactic parameters are set in a principled fashion on the basis of overt functional morphology. The main focus of the book is on the different positions of the finite verb in the Germanic SVO languages. In addition other syntactic phenomena null subjects, transitive expletive constructions and object shift and other language families Romance, Semitic and Slavic are discussed. A common explanation for all of the discussed phenomena is proposed. If and only if the features for person are distinctively marked by the agreement morphology, the agreement affixes are listed separately in the lexicon and project phrases of their own in syntax where they attract the verb to the head positions and allow the specifier positions to be filled by various phonologically unrealized elements. Special attention is given to issues of historical development and child language acquisition.

**Conception and Causation: Selected Philosophical Papers** John-Michael Kuczynski, Papers on the philosophy of mind and philosophical logic. Topics covered include probabilistic causation, the nature of formal truth, the role of language in thought, conceptual atomism, simulated vs. actual intelligence and the nature of emotion.

## **Conceptual Atomism and the Computational Theory of Mind**

**Computational Theory of Mind** John-Michael Kuczynski, 2007-08-23 What is it to have a concept? What is it to make an inference? What is it to be rational? On the basis of recent developments in semantics, a number of authors have embraced answers to these questions that have radically counterintuitive consequences for example. One can rationally accept self-contradictory propositions e.g. Smith is a composer and Smith is not a composer. Psychological states are causally inert; beliefs and desires do nothing. The mind cannot be understood in terms of folk psychological concepts e.g. belief, desire, intention. One can have a single concept without having any others; an otherwise conceptless creature could grasp the concept of justice or of the number seven. Thoughts are sentence tokens and thought processes are driven by the syntactic, not the semantic, properties of those tokens. In the first half of Conceptual Atomism and the Computational Theory of Mind, John Michael Kuczynski argues that these implausible but widely held views are direct consequences of a popular doctrine known as content externalism, this being the view that the contents of one's mental states are constitutively dependent on facts about the external world. Kuczynski shows that content externalism involves a failure to distinguish between, on the one hand, what is literally meant by linguistic expressions and, on the other hand, the information that one must work through to compute the literal meanings of such expressions. The second half of the present work concerns the Computational Theory of Mind (CTM). Underlying CTM is an acceptance of conceptual atomism, the view that a creature can have a single concept without having any others; and also an acceptance of the view that concepts are not descriptive, i.e. that one can have a concept of a thing without knowing of any description that is satisfied by that thing. Kuczynski shows that both views are false, one reason being that they presuppose the truth of content externalism, another being that they are incompatible with the epistemological anti-foundationalism proven correct by Wilfred Sellars and Laurence Bonjour. Kuczynski also shows that CTM involves a

misunderstanding of terms such as computation syntax algorithm and formal truth and he provides novel analyses of the concepts expressed by these terms Series A *Collected Papers Volume 3: Early Papers on the Philosophy of Mind* John-Michael Kuczynski, Papers on the philosophy of mind Topics include the relationship between linguistic and cognitive competence conceivability in relation to possibility simulated vs actual thought functionalism program causation in relation to mental causation the Turing Test the Language of Thought hypothesis and the nature of personal identity **Second Language Acquisition and Universal Grammar** Lydia White, 2003-03-06 This authoritative 2003 textbook provides an overview and analysis of current second language acquisition research conducted within the generative linguistic framework Lydia White argues that second language acquisition is constrained by principles and parameters of Universal Grammar The book focuses on characterizing and explaining the underlying linguistic competence of second language learners in terms of these constraints Theories as to the role of Universal Grammar and the extent of mother tongue influence are presented and discussed with particular consideration given to the nature of the interlanguage grammar at different points in development from the initial state to ultimate attainment Throughout the book hypotheses maintaining that second language grammars are constrained by universal principles are contrasted with claims that Universal Grammar is not implicated relevant empirical research is presented from both sides of the debate This textbook is essential reading for those studying second language acquisition from a linguistic perspective *Language Creation and Language Change* Michel DeGraff, 1999 Research on creolization language change and language acquisition has been converging toward a triangulation of the constraints along which grammatical systems develop within individual speakers and viewed externally across generations of speakers The originality of this volume is in its comparison of various sorts of language development from a number of linguistic theoretic and empirical perspectives using data from both speech and gestural modalities and from a diversity of acquisition environments In turn this comparison yields fresh insights on the mental bases of language creation The book is organized into five parts creolization and acquisition acquisition under exceptional circumstances language processing and syntactic change parameter setting in acquisition and through creolization and language change and a concluding part integrating the contributors observations and proposals into a series of commentaries on the state of the art in our understanding of language development its role in creolization and diachrony and implications for linguistic theory Contributors Dany Adone Derek Bickerton Adrienne Bruyn Marie Coppola Michel DeGraff Viviane D prez Alison Henry Judy Kegl David Lightfoot John S Lumsden Salikoko S Mufwene Pieter Muysken Elissa L Newport Luigi Rizzi Ian Roberts Ann Senghas Rex A Sprouse Denise Tangney Anne Vainikka Barbara S Vance Maaike Verrips *The Routledge Handbook of Second Language Acquisition, Morphosyntax, and Semantics* Tania Ionin, Silvina Montrul, Roumyana Slabakova, 2024-03-11 This handbook provides innovative and comprehensive coverage of research on the second language acquisition SLA of morphosyntax semantics and the interface between the two Organized by grammatical topic the chapters are written by

experts from formal and functional perspectives in the SLA of morphosyntax and semantics providing in depth yet accessible coverage of these areas All chapters highlight the theoretical underpinnings of much work in SLA and their links to theoretical syntax and semantics making comparisons to other populations including child language acquirers bilinguals and heritage speakers links to first language acquisition and bilingualism dedicating a portion of each chapter to the research methods used to investigate the linguistic phenomenon in question links to psycholinguistics and experimental linguistics and where relevant including intervention studies on the phenomenon in question links to applied linguistics The volume will be indispensable to SLA researchers and students who work on any aspect of the SLA of morphosyntax or semantics With its coverage of a variety of methodologies and comparisons to other populations such as child language acquirers early bilinguals heritage speakers and monolingual adults the handbook is expected to also be of much interest to linguists who work in psycholinguistics first language acquisition and bilingualism     **Issues in Övdalian Syntax** Piotr Garbacz,2009
