Challenges for the New Millennium Stefan N. Willich, S. Elm, 2013-04-17 In 1978 the World Health Organization WHO
designated the year 2000 as the due date for world health The Alma Ata declaration set the turn of the century as the target
for a level of health that would permit all people of the world to lead a socially and economically productive life At that magic
but arbitrary date most infectious diseases and many chronic conditions including diabetes and cancer were expected to have
been eradicated or at least controlled Such predictions were based on solid foundations In the 1 20 h century and
particularly since the 1970 s Western science and technology based or modern medicine has made quantum leaps in
numerous areas as diverse as pharmacology genetic and molecular biology surgical techniques infertility treatments and pre
and neo natal care This impressive trajectory of progress which continues unabatedly gave every reason to assume that come
the year 2000 humanity would finally be free from many of its ancient scourges However as we are all too well aware the new
millennium witnesses also ever more terrifying threats to our health as a result of the emergence of 2 AIDS in the early 80 s
the resurgence of infectious diseases such as 3 tuberculosis and malaria now drug resistant the absence of significant
breakthroughs in the treatment of cancer and cardiovascular diseases and the continuing dramatic gap in health care
between industrialized and developing countries to mention but a few examples **Stevens Indicator ...** ,1895 *Issues*
