## **Mother Machine Reproductive Technologies:**

*The Mother Machine* Gena Corea, 1985 A few pages on lesbians but a subject of some interest to lesbians P Thorslev

**Readings in Health Care Ethics** Elisabeth Boetzkes, Wilfrid J. Waluchow, 2000-05-29 Readings in Health Care Ethics provides a wide ranging selection of important and engaging contributions to the field of health care ethics. Designed as a course text for undergraduate use the anthology includes fifty six selections grouped into ten sections. Included are a wide range of the most important essays both on long standing issues in biomedical ethics such as consent, euthanasia and research involving human subjects and on issues that have particularly come to the fore in recent years such as the allocation of scarce medical resources and genetic alteration. An extensive introduction provides a accessible general overview of ethical theory for those without previous familiarity with philosophical concepts

### **Reproduction, Ethics, and the Law**

Joan C. Callahan, 1995 Scholars already saturated with moral commentary on new reproductive arrangements are in for a stimulating surprise. For this volume breaks new ground scrutinizing their impact at a more penetrating level and challenging the terms of the dominant debate. It should set a standard for further work and receive the attention of mainstream thinkers and policy makers that it so richly deserves. Human Studies a valuable contribution to the literature in an important and rapidly evolving area of law and applied ethics. Ethics virtually every essay is thought provoking and well informed and together they address just the topics you'd want to see covered as well as a few you might not have thought of. Medical Humanities Review extremely interesting reading for all those who are involved in or wish to know more about the moral, social and policy consequences of new reproductive technologies. Biosocial Science This thought provoking collection of essays addresses moral and legal questions revolving around modern human reproduction an invaluable resource for any family law practitioner. The Women's Advocate Editor Callahan presents a fascinating look at the facts, facets and legal effects of modern technology on reproduction. A work that provides insight on all issues concerning reproduction. Choice The book is a valuable contribution to the literature in an important evolving area of law and applied ethics. Ethics displays the richness of feminist scholarship. It points the way for a fuller appreciation of the varied voices of feminist analyses in many other areas. Journal of Health Politics, Policy and Law a comprehensive, compelling and carefully researched volume. This is applied feminist ethics at its very impressive best. Journal of Medical Ethics Essays address moral and legal quandaries related to human reproduction adding to the feminist dimension of the public discussion of these issues including new complexities in contraception and abortion technologies, frozen embryos, unwed fathers and the legal definition of parenthood and the use of fetal tissue

*Applied Ethics at the Turn of the Millennium* International Association for Philosophy of Law and Social Philosophy. Renner,2013-10-18 The evil child has infiltrated the cultural imagination taking on prominent roles in popular films television shows and literature This collection of essays from a global range of scholars examines a fascinating array of evil children and the cultural work that they perform drawing upon sociohistorical cinematic and psychological approaches The chapters explore a wide range of characters including Tom Riddle in the Harry Potter series the possessed Regan in William Peter Blatty s The Exorcist the monstrous Ben in Doris Lessing s The Fifth Child the hostile fetuses of Rosemary s Baby and Alien and even the tiny terrors featured in the reality television series Supernanny Contributors also analyse various themes and issues within film literature and popular culture including ethics representations of evil and critiques of society This book was originally published as two special issues of Literature Interpretation Theory

**Redesigning Life?** Brian Tokar,2001-05-04 Genetic engineering technologies are being promoted as keys to a brighter future These writings examine the hidden hazards of the new genetic technologies and reveal the emergence of worldwide resistance to unfettered exploitation

*Moving the Mountain* Flora Davis,1999 Moving the Mountain tells the story of the struggles and triumphs of thousands of activists who achieved half a revolution between 1960 and 1990 In this award winning book the most complete history of the women s movement to date Flora Davis presents a grass roots view of the small steps and giant leaps that have changed laws and institutions as well as the prejudices and unspoken rules governing a woman s place in American society Looking at every major feminist issue from the point of view of the participants in the struggle Moving the Mountain conveys the excitement the frustration and the creative chaos of feminism s Second Wave A new afterword assesses the movement s progress in the 1990s and prospects for the new century

*Prescriptions* Gayle Ormiston,Raphael Sassower,1990-02-15 The essays brought together in this volume are the product of a University of Colorado Colorado Springs Colloquium on Science Technology and Society devoted to foundations of health care practices Prescriptions contributes to the philosophy of medicine by redefining redrawing and resetting the respective domains of philosophy medicine and healthcare It provides a conceptual point of departure a point from which the radical changes that will be required of health care in the next century can be envisioned and acted upon Part I consists of three essays that provide critical analyses of the conceptual apparatus that informs the many dimensions of health care practices In general the contributors challenge the fundamental relationships of authority that exist between patients and health care practitioners question the tradition of using classical

ethical theories within the domain of health care and suggest a set of different directions in which health care should develop These essays demonstrate why a reevaluation of the culture of health care and not just specific practices is necessary The two essays in Part II explore the economic technical legal and public policy dimensions of contemporary medicine The novelty of these essays lies in their response to the challenges already posed by the three preceding essays each essay attempts to provide a specific contextual analysis for articulating and testing the broad conceptual and axiological problems raised therein Part III provides a more specific context for exploring the issues and themes articulated in Parts I and II Drawing attention to the techniques used to diagnose and supposedly cure the contributors directly attack the view that psychoanalysis can be understood in medical or scientific terms Those interested in the philosophical aspects of health care will find this volume provocative reading     (... ; 2).
