Meaning and Change of Meaning Gustaf Stern, 1964 *The American Journal of Psychology* Granville Stanley Hall, Edward Bradford Titchener, Karl M. Dallenbach, Madison Bentley, Edwin Garrigues Boring, Margaret Floy Washburn, 1912

Congress. Senate. Committee on Interstate Commerce, 1906 *The Problem of Meaning with Reference to Wittgenstein and Śāṅkara* S. Panneerselvam, 1993 **The Yearly County Court Practice ...** Charles Arnold White, 1916 *Essentialism* Garth L. Hallett, 1991-09-27 *American Probate Law and Practice* Frank Sumner Rice, 1894 *Thought* Walter Sylvester Gamertsfelder, 1920 The Lawyers Reports Annotated, Book 1-70, 1905 **Wittgenstein** Severin Schroeder, 2006-03-31

This text offers an account of Wittgenstein's philosophy Together with a biographical narrative it explains the key ideas of his work from his books the *Tractatus Logico Philosophicus* to his masterpiece the *Philosophical Investigations* **The Philosophy of J.N. Mohanty** Daya Krishna, K. L. Sharma, 1991 Nondescriptive Meaning and Reference Wayne A. Davis, 2005-07-14

Nondescriptive Meaning and Reference extends Wayne Davis's groundbreaking work on the foundations of semantics Davis revives the classical doctrine that meaning consists in the expression of ideas and advances the expression theory by showing how it can account for standard proper names and the distinctive way their meaning determines their reference He also shows how the theory can handle interjections syncategorematic terms conventional implicatures and other cases long seen as difficult for both ideational and referential theories The expression theory is founded on the fact that thoughts are event types with a constituent structure and that thinking is a fundamental propositional attitude distinct from belief and desire Thought parts ideas or concepts are distinguished from both sensory images and conceptions Word meaning is defined recursively sentences and other complex expressions mean what they do in virtue of what thought parts their component words express and what thought structure the linguistic structure expresses and unstructured words mean what they do in living languages in virtue of evolving conventions to use them to express ideas The difficulties of descriptivism show that the ideas expressed by names are atomic or basic The reference of a name is the extension of the idea it expresses which is determined not by causal relations but by its identity or content together with the nature of objects in the world Hence a name's reference is dependent on but not identical to its meaning A name is directly and rigidly referential because the extension of the idea it expresses is not determined by the extensions of component ideas The expression theory thus has the strength of Fregeanism without its descriptivist bias and of Millianism without its referentialist or causalist shortcomings The referential properties of ideas can be set out recursively by providing a

generative theory of ideas assigning extensions to atomic ideas and formulating rules whereby the semantic value of a complex idea is determined by the semantic values of its components Davis also shows how referential properties can be treated using situation semantics and possible worlds semantics The key is to drop the assumption that the values of intension functions are the referents of the words whose meaning they represent and to abandon the necessity of identity for logical modalities Many other pillars of contemporary philosophical semantics such as the twin earth arguments are shown to be unfounded

Incommensurability and Cross-Language Communication Xinli Wang, 2017-05-15 A dominant epistemological assumption behind Western philosophy is that it is possible to locate some form of commonality between languages traditions or cultures such as a common language or lexicon or a common notion of rationality which makes full linguistic communication between them always attainable Xinli Wang argues that the thesis of incommensurability challenges this assumption by exploring why and how linguistic communication between two conceptually disparate languages traditions or cultures is often problematic and even unattainable According to Wang's presuppositional interpretation of incommensurability the real secret of incommensurability lies in the ontological set ups of two competing presuppositional languages This book provides many original contributions to the discussion of incommensurability and related issues in philosophy and offers valuable insights to scholars in other fields such as anthropology communication linguistics scientific education and cultural studies
