Meanings Of Love

Charles Adams Allen

Meanings Of Love:

The Meanings of Love Robert E. Wagoner, 1997-05-21 This introductory text offers a clear concise look at the philosophy of love. The author's presentation assumes no previous knowledge of philosophy providing the humanities student with an insightful introduction to some of the most prominent writers and philosophers both ancient and modern. From the dialogues of Plato to the writings of feminist philosopher Luce Irigaray Wagoner presents six major ideas of love: erotic love, Christian love, romantic love, moral love, love as power and mutual love. This study asserts that even though we have only one word for love, six fundamentally different meanings can be distinguished: erotic love, Christian love, romantic love, moral love, love as power and mutual love. Wagoner identifies each of these ideas of love in terms of the special meaning it brings to experience. No one meaning is comprehensive. Each is shown to have a logic and legitimacy of its own. Why each view seems real and compelling is the focus of separate discussions as well as the price that may be exacted by each idea. The extent to which these ideas throw light on actual experience is striking but the book is not an empirical or psychological inquiry. How one self finds itself in another is first defined and then explored further to see how this shapes the rational and sexual aspects of life.

The Meaning of Love Vladimir Solovyov, 1985-10 Written in 1894 CW 4 Materialism can never provide a satisfactory explanation of the world. For every attempt at an explanation must begin with one's forming thoughts for oneself about the phenomena of the world. Materialism therefore takes its start with the thought of matter or of material processes. Thus it already has two different realms of facts before it: the material world and thoughts about it. It seeks to understand the latter by grasping them as a purely material process. It believes that thinking takes place in the brain in about the same way as digestion does in the animal organs. Just as it attributes to matter mechanical and organic effects so it also ascribes to it the capability under specific conditions to think. It forgets that it has now only

transferred the problem to another place It attributes the capability of thinking not to itself but to matter An in doing so it is back again at its starting point The materialistic view is not able to solve the problem but only to shift it pp 18 19 Of all of his works The Philosophy of Spiritual Activity is the one that Steiner himself believed would have the longest life and the greatest spiritual and cultural consequences It was written as a phenomenological account of the results of observing the human soul according to the methods of natural science This seminal work asserts that free spiritual activity understood as the human ability to think and act independently of physical nature is the suitable path for human beings today to gain true knowledge of themselves and of the universe This is not merely a philosophical volume but rather a warm heart oriented guide to the practice and experience of living thinking Readers will not find abstract philosophy here but a step by step account of how a person may come to experience living intuitive thinking the conscious experience of a purely spiritual content During the past hundred years since it was written many have tried to discover this new thinking that could help us understand the various spiritual ecological social political and philosophical issues facing us But only Rudolf Steiner laid out a path that leads from ordinary thinking to the level of pure spiritual activity intuitive thinking in which we become co creators and co redeemers of the world This volume is arguably the most essential of Steiner s works The thoughts in this book establish the foundation for all of Anthroposophy The Philosophy of Spiritual Activity is a translation from German of Die Philosophie der Freiheit GA 4 [The World of Love: The meanings of love](#) Isidor Schneider,1964 Selections from writings of poets novelists philosophers psychologists and scientists **The Meaning of Love** Vladimir S. Solov'ëv,Jane Marshall,1945 [The Biological Evolution of Love](#) Victor Karandashev,2026-01-01 This book discusses the biological evolution of love from the perspectives of evolutionary biology paleontology archaeology anthropology neuroscience psychology and other disciplines This interdisciplinary book presents an extensive analysis of the numerous studies theories and research findings about the biological evolution of love and love related constructs The author has compiled and presented multiple scholarly publications that have been available about the evolutionary science of love over the recent couple of centuries This book provides the most comprehensive review of the biological evolution of love in varieties of its types across many species of plants birds animals especially mammals and in the early human ancestors The author systematically examines research findings and discoveries focusing on the scholarly knowledge of the evolutionary processes that have been occurring throughout substantial periods of time thousands and millions of years

Cultural Typologies of Love Victor Karandashev,2022-09-01 This timely volume offers an integrative approach and a culturally diverse view of love conceptions experiences and expressions building on both individual and cultural typologies of love It comprehensively presents cultural and cross cultural studies on how culture affects love and offers a systematic description of types and cultural models of love The comprehensive reviews of methodology and findings provide a solid empirical basis for the creation of formal typologies This book will be useful for researchers interested in cross cultural studies of love across many

disciplines Its accessible language also makes it ideal for undergraduate and graduate students Readers will gain a comprehensive understanding of Cultural conceptions of love and methods for their research Multiple perspectives in the studies of love across world cultures Cultural models and typologies in an international perspective Cultural models and typologies from an interdisciplinary scientific perspective *Meaning in Life, Volume 2* Irving Singer,2009-12-30 An acclaimed philosopher offers a systematic mapping of the various facets of love In his widely acclaimed trilogy *The Nature of Love* Irving Singer traced the development of the concept of love in history and literature from the Greeks to the twentieth century In this second volume of his *Meaning in Life* trilogy Singer returns to the subject of his earlier work exploring a different approach Without denying his previous emphasis on the role of imagination and creativity in this book Singer investigates the ability of them both to make one's life meaningful A systematic mapping of the various facets of love including sexual love love in society and religious love *The Pursuit of Love* is an extended essay that offers Singer's own philosophical and psychological theory of love Rich in insight into literature the history of ideas and the complexities of our being *The Pursuit of Love* is a thought provoking inquiry into fundamental aspects of all human relationships

The Meaning of Love Vladimir Sergeyevich Solovyov,1980 **Meaning in Communication, Cognition and Reality** Martin Staude,2015-09-30 This book presents a general and formal theory of meaning signs and language The theory is presented in a clear and consistent way offering novel and provocative insights into the fundamental structures and processes of communication cognition and reality Key topics include distinctions and categories the self contradictory dualism of word vs object linguistic meaning monism relations and processes in the semiotic triangle conceptual prototypicality and fuzziness semantic fields and frames meaning medium vs forms as well as activation and co activation of meanings In order to illustrate and apply the theory everyday examples in particular power and law are discussed throughout the book Methodological questions of data collection and analysis are also addressed as they are relevant to the empirical application and verification of the theory The book combines approaches from systems theory non dualism prototype theory semantic field theory speech act theory and structuralism Due to its broad and interdisciplinary focus this book will not only appeal to semioticians philosophers and sociologists but also to linguists cultural anthropologists and cognitive scientists *The Many Meanings of Love in Beautiful Words and Photographs* ,1976 **God's Radical Love in Missio Dei** Edward

Kim,2024-12-30 Although missio Dei the mission of God has been a burning theme in missiology since the end of the twentieth century a key verse John 3 16 has been widely neglected in missiology until today Yet John 3 16 reveals missio Dei as the triune God's salvific activities in the world and shows us the very motivation for missio Dei God's Radical Love a love so vast transcultural and universal that no English words can translate the Hebrew Three questions are explored herein How does God's Radical Love in John 3 16 justify God's motivation for missio Dei as the work of the triune God in the Old Testament What does God really plan to achieve in missio Dei And how can missio Dei be applied by Christians in the twenty

first century Based on his own experiences the author specifically explores how Messianic Jewish congregations in Israel could respond to and participate in missio Dei with the hope that thoughtful readers may apply this study to their own contexts to engage their own congregations with a deeper understanding of God's Radical Love in missio Dei *The World of Love*, 1964 *The Human Meaning* Valentin Matcas, 2017-04-20 Love and the Divine are the best meanings there can be just because love stands at the top of your feelings and you treasure the most while the Divine is everything that exists You cannot find anything beyond love and the Divine capable enough to set your meaning in life and in this world simply because there is nothing else beyond them However there is significantly more to learn and understand about the human meaning just because as it is presented in this world today through science literature philosophy and through the rest of ideologies it is not enough You fail to understand the human meaning and this causes you to fail your own meaning in life and in this world at least your natural meaning as you receive it from Life and from the Divine Because the concept of meaning is presented to you empirically today you cannot understand it accurately in this manner but only through doctrine and beliefs you can never engage your reasoning in this manner in order to grasp accurately your own natural meaning your natural meaning is easily hijacked and everything is done on purpose to harm and exploit you In this manner you end up fulfilling consensually implemented meanings throughout life on behalf of the rich and the powerful of this world since they are the ones controlling ideologies and therefore consensual meanings in this world Not much that you do now counts for Life and for the Divine despite of what ideologies tell and promise and when you look back now you may see the kind of world that you create And do not blame the rich and the powerful of this world since you are the one doing everything for them Many times it is for your children that you struggle throughout life to make them happy to make them worthy and to make everything count because this is exactly your meaning in your family Yet can't it be the same in your community and in society Does it ever make a difference to have or not to have a specifically defined meaning in life and in this world Yes it certainly makes a difference because all meanings count even the slightest ones since they are connected And it is always a matter of identifying your meanings instead of fulfilling them unknowingly otherwise you end up working your entire life in vain While through your consensually induced meanings you end up working against the meanings of others deliberately or not living your life against your loved ones While they can certainly feel and this ruins entire relationships This is your consensual meaning in your family in society in life and in this world And so you end up living your life against yourself against your own natural meaning Throughout this book we follow identify define understand and model the human meaning genuine and consensual from all perspectives and in all contexts You learn about your meaning in life in this world in society within your family and genetic line within your own cognitive system within higher worlds and within everything that exists
