research from the development of improved research designs to more accurate methods of problem measurement and outcome analysis. Drawing upon these significant advances the two volume handbook of Empirical Social Work Practice brings together empirically validated interventions for many of the psychosocial problems most frequently encountered by social workers in their daily practice. Unlike other books in the field that employ a theory based approach to treatment this handbook focuses on the best supported methods of helping clients with particular problems irrespective of theoretical biases offering clinicians a valuable compendium of practice guidelines for treatment. Edited and authored by recognized experts in the field the Handbook of Empirical Social Work Practice is clearly written and organized for easy reference.

Volume Two covers key social problems and practice related issues including Crime, homelessness and unemployment, Domestic violence and sexual abuse, Family conflict and preservation, Practice approaches for older clients, Empirically based supervision. With information that is at once accessible and up to date the Handbook of Empirical Social Work Practice is a vital source of guidance for today's clinical social workers and other practicing mental health professionals as well as students. One of the best tools to promote the values of the social work profession is that of empirical social work practice. Telling the truth is one of these values and discovering the truth is something that empirical research is very good at. This

book presents credible reviews of contemporary empirical literature pertaining to selected behavioral affective and intellectual disorders and their psychosocial assessment and treatment That such a book is now possible is a striking affirmation of the merits of the approach to social work called empirical clinical practice from the *Handbook of Empirical Social Work Practice* *Encyclopedia of Social Work*, 1995 *Measures for Clinical Practice and Research : A Sourcebook Volume 1: Couples, Families, and Children* Joel Fischer Professor of Social Work University of Hawai'i, Kevin Corcoran Professor of Social Work Portland State University, 2006-12-13 The fourth edition of this essential resource has dozens of new scales as well as updated information for existing instruments expanding and cementing its utility for members of all the helping professions including psychology social work psychiatry counseling nursing and medicine Each instrument is reproduced in its entirety and critiqued by the editors who provide guidance on how to select and score them This first volume covers measures for use with couples families and children its companion focuses on adults Alone or as a set these classic compendiums are powerful tools that clinicians and researchers alike will find an invaluable addition to or update of their libraries Giving clinicians the scales they need to measure their clients problems and monitor their outcomes these all in one sourcebooks bring effective accountable practice within reach for today s busy professionals *Measures for Clinical Practice: Adults* Joel Fischer, Kevin J.
