Abstract

Belgium, like its neighbours, has received pre- and post-war European and non-European labour immigrants and their families, whose children are forming an emerging second generation. Likewise, Belgium attracts an increasingly diverse inflow of refugees, asylum seekers, undocumented migrants and EU free movers. As a multination state, however, Belgium is also unique. Specifically, it stands out by the late and diffuse implementation of official integration policies, with considerable discrepancies in policy practices between the semi-autonomous regions of Flanders, Wallonia and Brussels. This review presents the main national data sources on the integration of immigrant communities in the 1990s, including the 1991 census and a series of special surveys. The main part of the paper discusses exemplary measures and findings pertaining to socio-economic, cultural and political dimensions of immigrant integration. The analyses document contextual variation in enduring socioeconomic disadvantage, along with cultural pluralism and multiple identities in ethnic relations between immigrants and hosts. We conclude that the Belgian case has wider comparative relevance: it is demonstrated that the varying contexts of immigration *and* settlement, *and* more or less conflicted ethnic relations between immigrants and hosts, make the difference between integration and exclusion.

Measuring Immigrant Integration:

Measuring Immigrant Integration Peter Reinsch, 2001 How do social researchers and other observers recognize successfully integrated immigrants What presumptions are made to detect and clarify individual differences in integration In this book the author develops a conceptual model that outlines the numerous normative theoretical and methodological issues bound to the measurement of immigrant integration He then uses this model to order and interpret survey data gathered in the Dutch city of Haarlem Peter Reinsch takes an essentially normative step by ranking residents according to their realization of three personal goals self reliance contentment and sociability These goals presumably reflect local objectives characteristic of the tolerant vision so often propagated in Dutch debates and policies A broad selection of survey measures are then reviewed that represent divergent clarifications for immigrant integration The book provides social observers with numerous guidelines to help systematize and ameliorate their analyses of the integration process a process crucial for the future of European cities BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved
