**Mechanization Takes Command** Sigfried Giedion,2013 First published in 1948 Mechanization Takes Command is an examination of mechanization and its effects on everyday life A monumental figure in the field of architectural history Sigfried Giedion traces the evolution and resulting philosophical implications of such disparate innovations as the slaughterhouse the Yale lock the assembly line tractors ovens and comfort as defined by advancements in furniture design A groundbreaking text when originally published Giedion s pioneering work remains an important contribution to architecture philosophy and technology studies Mechanization Takes Command Sigfried Giedion (Historien d'art, Tchécoslovaquie, Suisse, Etats-Unis),1970 **Mechanization Takes Command** Siegfried Giedion,1970 Mechanization Takes Command José Maria Gironella,1949 **Mechanization Takes Command** Sigfried Giedion,1955 **McLuhan in Space** Richard Cavell,2002-01-01 Demonstrates how McLuhan extended insights derived from advances in physics and artistic experimentation into a theory of acoustic space which he then used to challenge the assumptions of visual space that had been produced through print culture *Mechanization Takes Command - a Contribution to Anonymous History* ,1943

**Mechanization takes command** Sigfried Giedion,1969 Experimenting the Human G Douglas Barrett,2023-01-13 An engaging argument about what experimental music can tell us about being human In Experimenting the Human G Douglas Barrett argues that experimental music speaks to the contemporary posthuman a condition in which science and technology decenter human agency amid the uneven temporality of postwar global capitalism Time moves forward for some during this period while it seems to stand still or even move backward for others Some say we re already posthuman while others endure the extended consequences of never having been considered fully human in the first place Experimental music reflects on this state Barrett contends through its interdisciplinary involvements in postwar science technology and art movements Rather than pursuing the human s beyond experimental music addresses the social and technological conditions that support such a pursuit Barrett locates this tendency of experimentalism throughout its historical entanglements with cybernetics and in his intimate analysis of Alvin Lucier s neurofeedback music Pamela Z s BodySynth performances Nam June Paik s musical robotics Pauline Oliveros s experiments with radio astronomy and work by Laetitia Sonami Yasunao Tone and Jerry Hunt Through a unique meeting of music studies media theory and art history Experimenting the Human provides fresh insights into what it means to be human **Atari Design** Raiford Guins,2020-11-12 Drawing from deep archival research and extensive interviews Atari Design is a rich historical study of how Atari s industrial and graphic designers contributed to the development of the video game machine Innovative game design played a key role in the growth of Atari from Pong to Asteroids and beyond but fun challenging and exciting game play was not unique to the famous Silicon Valley company What set it apart from its competitors was innovation in the coin op machine s cabinet Atari did not just make games it designed

products for environments With tasteful packaging Atari exceeded traditional locations like bars amusement parks and arcades developing the look and feel of their game cabinets for new locations such as fast food restaurants department stores country clubs university unions and airports making game play a ubiquitous social and cultural experience By actively shaping the interaction between user and machine overcoming styling limitations and generating a distinct corporate identity Atari designed products that impacted the everyday visual and material culture of the late 20th century Design was never an afterthought at Atari Propaganda 2.1 Peter K. Fallon,2024-06-27 As the Internet Age endures and expands Peter K Fallon peers into the Pandora s Box of our age A twenty first century update to Jacques Ellul s masterful sociological study Propaganda Propaganda 2 1 explores how the digital revolution has transformed the boundaries between individuals institutions and centres of power Coupling historical analysis with a wealth of current examples Fallon exposes the intricate and insidious ways propaganda alters our daily realities Propaganda 2 1 is divided into three sections propaganda 1 0 2 0 and 2 1 Propaganda 1 0 compares the popular conception of propaganda with persuasive techniques such as rhetoric and coercion 2 0 reveals how the development of moveable type printing built the foundations of modern propaganda and finally 2 1 inhabits the post truth world in its totality Whilst the media landscape continually shifts Propaganda 2 1 s analysis is an opportunity to tackle this new reality *Mechanization Takes Command and Pop Art* Barbara Epstein,1971 **Capitalism and the Senses** Regina Lee Blaszczyk,David Suisman,2023-06-13 Capitalism and the Senses is the first edited volume to explore how the forces of capitalism are entangled with everyday sensory experience If the senses have a history as Karl Marx wrote then that history is inseparable from the development of capitalism which has both taken advantage of the senses and influenced how sensory experience has changed over time This pioneering collection shows how seeing hearing tasting smelling and touching have both shaped and been shaped by commercial interests from the turn of the twentieth century to our own time From the manipulation of taste and texture in the food industry to the careful engineering of the feel of artificial fabrics capitalist enterprises have worked to commodify the senses in a wide variety of ways Drawing on history anthropology geography and other fields the volume s essays analyze not only where this effort has succeeded but also where the senses have resisted control and the logic of markets The result is an innovative ensemble that demonstrates how the drive to exploit sensorial experience for profit became a defining feature of capitalist modernity and establishes the senses as an important dimension of the history of capitalism Contributors Nicholas Anderman Regina Lee Blaszczyk Jessica P Clark Ai Hisano Lisa Jacobson Sven Kube Grace Lees Maffei Ingemar Pettersson David Suisman Ana Mar a Ulloa Nicole Welk Joerger

**Teaching Landscape Architectural History** American Society of Landscape Architects Foundation,1974 The Tragic in Architecture Richard Patterson,2000 Is modern architecture no longer equipped to deal with the great themes in architecture By focusing on the tragic genre this title asks some of the most far reaching questions about the meaning of

contemporary architecture Has a modern delight in functionalism and repression of figuration put paid to the expression of human themes and narrative content When put to the test what has been the approach of contemporary architects who have been called upon to tackle the most abject horrors of our age such as the Holocaust By holding the classical form of the tragic up for scrutiny the texts in this title explore the ways that architects have also been seeking to deal with the incomplete the fragmented and partial the historicisation of nature and the appearance of the popular culture There are substantial essays on the theme by Robert Maxwell John Outram David Hamilton Eddy and Richard Patterson Buildings are also analysed which express some of the great human themes or tragedies in our time These include among others Foster s Berlin Reichstag Libeskind s Jewish Museum and Chipperfield s designs for the San Michele Cemetery in Venice Architects David Chipperfield Peter Eisenman Foster and Partners James Ingo Freed Daniel Libeskind John Outram **Social Problems and Social Policy** James Melvin Reinhardt,1952 Journal of the Royal Society of Arts Royal Society of Arts (Great Britain),1950 Lessons from Bernard Rudofsky Architektur Zentrum Wien,2007 What we need is not a new way of building but a new way of living so the subtitle of one of Rudofsky s last works Setting out from the assumption that the design of every single room in a house is based on a physical function one place to lie the body down to rest another to take in food a third to step into a tub to bath Bernard Rudofsky 1905 88 believed architecture served to stimulate the senses and refine everyday culture His conception of architecture and design is more topical today than ever Internationally renowned in his day for the exhibitions he created for MoMA in the 1940s and 1950s today he is remembered above all for his sharp tongued witty writings which still speak to a broad audience Lessons from Bernard Rudofsky is more than a collection of essays by experts and introduction to the complex concept of architecture and living of a cosmopolitan and unconventional thinker the rich visual material conveys his philosophy I believe that sensory pleasure should take precedence over intellectual pleasure in art and architecture
