Monism as Connecting Religion and Science Ernst Haeckel,1895 **Monism As Connecting Religion and Science** Ernst Haeckel,2019-04-21 The following lecture on Monism is an informal address delivered extemporaneously on October 9 1892 at Altenburg on the seventy fifth anniversary of the Naturforschende Gesellschaft des Osterlandes The immediate occasion of it was a previous address delivered by Professor Schlesinger of Vienna on Scientific Articles of Faith This philosophical discourse contained with reference to the weightiest and most important problems of scientific investigation much that was indisputable but it also contained some assertions that challenged immediate rejoinder and a statement of the opposite view As I had for thirty years been very closely occupied with these problems of the philosophy of nature and had set forth my convictions with respect to them in a number of writings a wish was expressed by several members of the Congress that on this occasion I should give a summary account of these It was in compliance with this wish that the following Scientific Confession of Faith was uttered The substance of it as written from recollection on the day after its delivery first appeared in the Altenburger Zeitung of 19th October 1892 In its present form the Altenburg address is considerably enlarged and some parts have been more fully worked out In the notes p 9 I several burning questions of the present day have been dealt with from the monistic point of view *Monism as Connecting Religion and Science* Ernst Heinrich Philipp August Haeckel,2022-10-27 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant Monism as Connecting Religion and Science Ernst Haeckel,2022-09-04 DigiCat Publishing presents to you this special edition of Monism as Connecting Religion and Science A Man of Science by Ernst Haeckel DigiCat Publishing considers every written word to be a legacy of humankind Every DigiCat book has been carefully reproduced for republishing in a new modern format The books are available in print as well as ebooks DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature *Monism as Connecting Religion and Science a Man of Science* Haeckel Ernst,2016-06-21 Unlike some other reproductions of classic texts 1 We have not used OCR Optical Character Recognition as this leads to bad quality books with introduced typos 2 In books where there are images such as portraits maps sketches etc We have endeavoured to keep the quality of these images so they represent accurately the original artefact Although occasionally there may be certain

Evolutionary Theories and Religious Traditions Bernard Lightman, Sarah Qidwai, 2023-11-21 Before the advent of radio conceptions of the relationship between science and religion circulated through periodicals journals and books influencing the worldviews of intellectuals and a wider public In this volume historians of science and religion examine that relationship through diverse mediums geographic contexts and religious traditions Spanning within and beyond Europe and North America chapters emphasize underexamined regions New Zealand Australia India Argentina Sri Lanka Egypt and the Ottoman Empire and major religions of the world including Christianity Hinduism Buddhism Confucianism and Islam interactions between those traditions as well as atheism monism and agnosticism As they focus on evolution and human origins contributors draw attention to European scientists other than Darwin who played a significant role in the dissemination of evolutionary ideas for some those ideas provided the key to understanding every aspect of human culture including religion They also highlight central figures in national contexts many of whom were not scientists who appropriated scientific theories for their own purposes Taking a local national transnational and global approach to the study of science and religion this volume begins to capture the complexity of cultural engagement with evolution and religion in the long nineteenth century

Monism as Connecting Religion and Science Ernst Haeckel (Naturphilosoph, Zoologe, Deutschland), 1894

Vying for Truth - Theology and the Natural Sciences Hans Schwarz, 2014-06-18 The emancipation of the natural sciences from religion was a gradual affair during the last four centuries Initially many of the leading scientists were churchmen indicating a symbiosis between faith and reason Due to the increasing specialization in the sciences this close connection came to an end often leading to antagonism and mutual suspicion This book traces this historical development with its twists and turns in both Europe and North America It depicts the major players in this story and outlines their specific contributions The main focus is on the 19th and 20th centuries with figures such as Darwin and Hodge but also Beecher and Abbott in the 19th century In the 20th century the narrative starts with Karl Barth and moves all the way to Hawking and Tipler Special attention is given to representatives from North America Great Britain and Germany In conclusion important issues are presented in the present day dialogue between theology and the natural sciences The issue of design and fine tuning is picked up and advances in brain research Finally technological issues are assessed and the status of medicine as a helpmate for life is discussed An informative and thought provoking book

Darwinian Heresies Abigail Lustig, Robert J. Richards, Michael Ruse, 2004-08-30 In Darwinian Heresies which was originally published in 2004 prominent historians and philosophers of science trace the history of evolutionary thought and challenge many of the assumptions that have built up over the years Covering a wide range of issues starting in the

eighteenth century Darwinian Heresies brings us through the time of Charles Darwin and the Origin and then through the twentieth century to the present It is suggested that Darwin s true roots lie in Germany not his native England that Russian evolutionism is more significant than many are prepared to allow and that the true influence on twentieth century evolution biology was not Charles Darwin at all but his often despised contemporary Herbert Spencer The collection was intended to interest to excite to infuriate and to stimulate further work The Critical Review of Theological & Philosophical Literature Stewart Dingwall Fordyce Salmond,1895 A Bibliography of German Literature in English Translation Bayard Quincy Morgan,1922 **Studies in Language and Literature** ,1922 Studies in Language and Literature University of Wisconsin,1922 **A Catalogue of the Best Books in Every Department of Literature** Burrows Brothers Company, Cleveland,1899 Feeling Strangely in Mid-Century Spanish and Latin American Women’s Fiction Tess C. Rankin,2023-12-15 An Open Access edition of this book is available on the Liverpool University Press website and the OAPEN library as part of the Opening the Future project with COPIM The early twentieth century was awash in revolutionary scientific discourse and its uptake in the public imaginary through popular scientific writings touched every area of human experience from politics and governance to social mores and culture Feeling Strangely argues that these shifting scientific understandings and their integration into Hispanic and Lusophone society reshaped the experience of gender The book analyzes gender as a felt experience and explores how that experience is shaped by popular scientific discourse by examining the strange femininity of young protagonists in four novels written by women in Spanish and Portuguese Rosa Chacel s *Memorias de Leticia Valle* published in Argentina in 1945 Norah Lange s *Personas en la sala* Argentina 1950 Carmen Laforet s *Nada* Spain 1945 and Clarice Lispector s *Perto do cora o selvagem* Brazil 1943 It pairs each novel with a broad scientific theme selected from those that captured the contemporary popular imagination to argue that the young female protagonists in these novels all put forth visions of young womanhood as an experience of strangeness Building on Carmen Mart n Gait e s term *chicas raras* Rankin proposes this strangeness as constitutive of a gendered experience inextricable from affective and material engagements with the world **The riddle of the universe at the close of the nineteenth century, tr. by J. McCabe** Ernst Heinrich P.A. Haeckel,1902
