Bibliography of Agriculture with Subject Index, 1993 *Annual Review of Computer Science* Joseph F. Traub, 1990 The series will be suspended after this volume. Although critical reception has been good according to the preface written by the editor in chief finding computer scientists willing to write critical review articles has been difficult and the editors have concluded that the series was launched prematurely. The impact of computers on all of modern science technology and society is indisputably enormous but the pool of available writing talent is too small. This volume contains ten review articles and a special topics section with ten presentations. Annotation copyrighted by Book News Inc Portland OR
