Monopoly Omnibus:

The Monopoly Omnibus Gyles Daubeney Brandreth,1985-01 The Omnibus Elizabeth Amann,2023-05-10 The introduction of omnibus services in the late 1820s revolutionised urban life in Paris London and many other cities As the first form of mass transportation in principle they were for everyone they offered large swaths of the population new ways of seeing both the urban space and one another This study examines how the omnibus gave rise to a vast body of cultural representations that probed the unique social experience of urban transit These representations took many forms from stories plays and poems to songs caricatures and paintings and include works by many well known artists and authors such as Picasso and Pissarro and Charles Dickens Wilkie Collins and Guy de Maupassant Analysing this corpus the book explores how the omnibus and horse drawn tram functioned in the cultural imagination of the nineteenth century and looks at the types of stories and values that were projected upon them The study is comparative in approach and considers issues of gender class and politics as well as genre and narrative technique **The Railway Times ...** ,1857 **Urban Transit Systems and Technology** Vukan R. Vuchic,2007-02-16 This is the only current and in print book covering the full field of transit systems and technology Beginning with a history of transit and its role in urban development the book proceeds to define relevant terms and concepts and then present detailed coverage of all urban transit modes and the most efficient system designs for each Including coverage of such integral subjects as travel time vehicle propulsion system integration fully supported with equations and analytical methods this book is the primary resource for students of transit as well as those professionals who design and operate these key pieces of urban infrastructure **Tramway and Railway World** ,1910 **Traction and Transmission** ,1903 *The North American Review* Jared Sparks,Edward Everett,James Russell Lowell,Henry Cabot Lodge,1894 Vols 277 230 no 2 include Stuff and nonsense v 5 6 no 8 Jan 1929 Aug 1930 **The Harnessing of Power** Maxwell Gordon Lay,2018-07-27 This book examines how the 19th century s transport legacy of bicycles trains ocean going steamers trucks trams buses and cars arose creating numerous new technologies and markets Nothing like this range of transport changes had occurred before and the 20th century changes were incremental compared with those of the 19th century The book explores where the key transport features came from and why there were so many inventions innovations and inconsistencies The Industrial Revolution was a key part of the process as it had strong links with transport developments This text adopts a broad global perspective but has a strong British orientation as the Industrial Revolution was a process predominantly initiated and implemented in Britain Nevertheless when the Revolution lost momentum Britain began to lose its leadership By century s end France and south western Germany were dominant change makers and the USA was appearing on the horizon The book also highlights the many individual inventors and entrepreneurs who caused the dramatic transport changes and notes that they did this predominantly through individual initiatives to satisfy personal rather than corporate or national goals and that they were often hindered rather than aided by officialdom
