## **Mormons Map:**

**Mormon's Map** John L. Sorenson,2000 As the ancient prophet Mormon edited the scriptural texts that would become the Book of Mormon he must have had a map in his mind of the places and physical features that comprised the setting for the events described in that book Mormon s Map is Book of Mormon scholar John Sorenson s reconstruction of that mental map solely from information gleaned from the text after years of intensive study He describes his method establishes the overall shape of Book of Mormon lands sorts out details of topography distance direction climate and civilization and treats issues of historical geography The resultant map will facilitate analysis of geography related issues in the Book of Mormon narrative and also be of help in evaluating theories about where in the real world the Nephite lands were located

**Mormon Pioneer National Historic Trail** Stanley Buchholz Kimball,1991      **Mapping Mormonism** Brandon Plewe,S. Kent Brown,Donald Q. Cannon,Richard H. Jackson,2012 Mormonism began in New York in the early 1800s and has become a world religion This book uses maps charts and timelines to visualize The Church of Jesus Christ of Latter day Saints from its foundation to the present day Topics covered include the migrations of the Latter day Saints during the lifetime of Joseph Smith the settlement of the American West proselytizing and growth around the world programs instituted to support members and the diverse churches of the broader Restoration movement Rich graphics illustrate and describe activities of church members including genealogical research establishment of schools economic development political affiliation and temple building This book visually encapsulates essential information about Mormons and The Church of Jesus Christ of Latter day Saints

**The Mapmakers of New Zion** Richard V. Francaviglia,2015 From their earliest days on the American frontier through their growth into a worldwide church the spatially expansive Mormons made maps to help them create idealized communities migrate to and colonize large parts of the American West visualize the stories in their sacred texts and spread their message internationally through a well organized missionary system This book identifies many Mormon mapmakers who played an important but heretofore unsung role in charting the course of Latter day Saint history For Mormons maps had and continue to have both practical and spiritual significance In addition to using maps to help build their new Zion and to explore the Intermountain West Latter day Saint mapmakers used them to depict locations and events described in the Book of Mormon Featuring over one hundred historical maps reproduced in full color many never before published The Mapmakers of New Zion sheds new light on Mormonism and takes readers on a fascinating journey through maps as both historical documents and touchstones of faith Winner of the Southwest Book Design and Production Award from the New Mexico Book Association Selected as on the American Library Association s Best of the Best from University Presses      **Mapping And Imagination In The Great Basin** Richard V. Francaviglia,2005-03-07 The Great Basin was the last region of continental North America to be explored and mapped and it remained largely a mystery to Euro Americans until well into the nineteenth century In Mapping and Imagination in the Great Basin geographer historian Richard

Francaviglia shows how the Great Basin gradually emerged from its cartographic silence as terra incognita and how this fascinating process both paralleled the development of the sciences of surveying geology hydrology and cartography and reflected the changing geopolitical aspirations of the European colonial powers and the United States Francaviglia's interdisciplinary account of the mapping of the Great Basin combines a chronicle of the exploration of the region with a history of the art and science of cartography and of the political economic and cultural contexts in which maps are created. It also offers a compelling wide ranging discussion that combines a description of the daunting physical realities of the Great Basin with a cogent examination of the ways humans from early Native Americans to nineteenth century surveyors to twentieth century highway and air travelers have understood defined and organized this space psychologically and through the medium of maps. Mapping and Imagination in the Great Basin continues Francaviglia's insightful richly nuanced meditation on the Great Basin landscape that began in Believing in Place
