Mosbys Nursing Concept Map Creator:

Mosby's Nursing Concept Map Creator Jean Foret Giddens, Elaine Kennedy, 2005-05 This unique easy to use program walks you through each step involved in gathering organizing and entering patient data into a plan of care. Its flexible design and interactive approach make it a fun and effective way to learn concept mapping techniques while you build real life skills for collecting and evaluating data for patient care. Applicable to all clinical practice areas including med surg, pediatrics, critical care, maternity and psychiatric nursing. Easy to use program walks users through the steps of constructing a concept map including: Creating a data sheet with assessment, physical examination, findings, treatments, pathophysiology, medications and more. Entering medical diagnoses, Identifying appropriate nursing diagnoses and collaborative problems, Providing supporting data for each patient problem, Prioritizing key nursing diagnoses and collaborative problems, Determining nursing interventions, Building the concept map and adding arrows to show relationships, Creating an evaluation summary. Flexible programming allows users to customize their concept maps by moving boxes and adding multidirectional arrows that can point to more than one box to indicate relationships. Data sheet feature allows users to record key preliminary information such as assessment, physical examination, data, pathophysiology, treatments, diagnostic tests, results and much more. Interview data can be entered using a functional health patterns or review of systems approach. Data is color coded by type: assessment, nursing diagnosis, intervention, etc. throughout the program and in the finished concept map and to help users visually differentiate content and more clearly understand the complexities of patient care. The save and modify function allows users to return at a later date to make modifications to data and/or the concept map. Evaluation summary step allows users to enter evaluation data after seeing the patient in clinicals.

Nursing Education in the Clinical Setting Roberta J. Emerson, 2006-09-19 2007 AJN Book of the Year Award Winner. Nursing Education in the Clinical Setting provides a practical approach to clinical nursing instruction. Although grounded in adult learning theory, this unique resource provides practical suggestions and addresses common questions and issues. The text incorporates illustrative scenarios, discussion questions and reflection exercises designed to facilitate thoughtful application of the content. Addresses the role transition for a nurse with clinical expertise to that of clinical nursing instructor. Provides important tips for effectively appraising student performance such as student involvement in self evaluation and goal setting and suggestions for how evaluation and appraisal are shared with the student. Incorporates sample scenarios to illustrate concepts and allow the reader to apply them. Integrates discussion questions and exercises designed to facilitate thoughtful application and critical thinking skills. Addresses all aspects of learning including cognitive e.g. critical thinking, affective e.g. caring and psychomotor e.g. technical skills. Provides actual examples of tools to be used for documenting student performance and approaches for stimulating student involvement and critical thinking. Includes a separate chapter on Clinical Faculty as Clinical Coach that discusses how learning is facilitated in the clinical setting with the guidance of an effective teacher. Features a Clinical Toolbox that

contains a variety of supplemental resources including sample approaches for teaching and evaluation suggestions for preparing anecdotal notes and relevant reference material Incorporates issues related to computer access of patient data banks for students and the federal regulations mandated by HIPAA and their clinical education implications **Priorities in Critical Care Nursing - E-Book** Linda D.
