Mosquito Stopwatch:

Mosquitopanik! Martin W. Bowman,2004-09-19 Of all the planes that flew in WW2 the Wooden Wonder the two engined Mosquito or Mossie as it was affectionately called was truly the most versatile and feared by the Germans Fast and manoeuvrable the Mossie was just as at home in the pathfinder role as she was as a fighter interceptor particularly of V1s as a night fighter low level bomber Mosquitopanik tells of the hugely successful war career of this much loved aeroplane that caught the public s and its pilots imagination Here we have gripping tales of action in the air thanks to the most meticulous research by a true enthusiast

Spartan Mosquitoes Ernest Durwood Scullion,2022-11-07 IMAGINE flying miles above the earth in a wooden airplane with no pressurization and little heat At 30 000 feet the outside air temperature is about 35 Fahrenheit After a few hours the cabin temperature drops to 20 Now imagine taking aerial photographs of Canada s Arctic to map the land after World War II and living a life of isolation in a tent on the permafrost near the top of the world

Photographer Ernest Scullion experienced these harsh conditions first hand when flying in the tail section of the Spartan Mosquito an airplane used for fighting and photo reconnaissance Spartan Mosquitos chronicles the events surrounding his time capturing the landscape from the plane s tail section between 1956 and 1962 when the high Arctic had never been photographed Most of it had never even been seen by humans Radios and compasses did not work near the North Pole so the airplanes flew without any way to get in touch with home base Spartan Mosquitos is an intimate portrait of the adventures and hazards Scullion endured from coping with exhaust fumes to full blown fires giving readers a window into his historic contribution to proving sovereignty of Canada s Arctic
