The British National Bibliography Arthur James Wells,2009 **Factors Affecting Substance Abuse in Adolescent Females in Rural Residential Communities** Susan L. Renes,2008 During the last 20 years in the United State gender identity peer relationships and parental relationships have all been associated with adolescent female substance use in urban contexts The goal of this study was to explore these associations with adolescent

females living in rural environments The quantitative correlation study utilized data gathered from self reports of females 12 to 15 years of age attending middle school in two rural Washington State communities Levels of current or 30 day use of alcohol marijuana and cigarettes were consistent with national levels of use The level of current inhalant use however was more than twice the national level European American and Hispanic Spanish Latino ethnic groups showed a higher risk for current use of cigarettes marijuana and amphetamines and American Indian Alaska Natives showed a higher risk for current alcohol use than Asian Americans Native Hawaiians and African Americans The gender identity of aggressive masculinity was found as the best predictor of illegal substance use while peer attachment and parent attachment offered some protection from illegal substance use for the population Combining the results of this study with the work of other researchers could improve substance abuse prevention practices and improve the understanding of how and why such behavior is found among this group Leaf ii

The Guide to Medical Organizations and Agencies ,2000 **Encyclopedia of Medical**

Organizations and Agencies ,1999 **Statistics for Health Care Professionals** Ian Scott,Debbie Mazhindu,2005-01-13

Statistics for Health Care Professionals is an accessible guide to understanding statistics within health care practice Focusing on quantitative approaches to investigating problems the book introduces the basic rules and principles of statistics Challenging the notion that statistics are often incomprehensible and complex to use the authors begin by presenting a how to section explaining how specific statistical tests can be performed They also help readers to understand the language of statistics which is often a stumbling block for those coming to the subject for the first time The reader is taught how to calculate statistics by hand as well as being introduced to computer packages to make life easier and then how to analyse these results As the results of health care research are so integral to decision making and developing new practice within the profession the book encourages the reader to think critically about data analysis and research design and how these can impact upon evidence based practice This critical stance is also crucial in the assessment of the many reports and documents issued within the health industry Statistics for Health Care Professionals includes practical examples of statistical techniques throughout and the exercises within and at the end of each chapter help readers to learn and to develop proficiency There is also a glossary at the end of the book for quick and easy referencing This book is essential reading for those coming to statistics for the first time within a health care setting
