## Masters Of Modern Architecture:

**Masters of Modern Architecture** Edwin Hoag, Joy Hoag, 1977 Discusses the founding of modern architecture through the lives and works of four important architects *Masters of modern architecture; Frank Lloyd Wright; public buildings*, 1970

**Masters of Modern Architecture** John Peter, 1958 Photographs of selected works of 62 architects from various parts of the world **Age of the Masters** Reyner Banham, 1975 The Age of the Masters was the age of an architectural revolution that lasted over fifty years from Charles Rennie Mackintosh's Glasgow Art School at the beginning of the century to Mies van der Rohe's National Gallery in Berlin at the end of the sixties. While they lived the Masters comprised some of the most powerful architectural talents the Western world has yet produced and at least two men of towering genius Frank Lloyd Wright and Le Corbusier. Their aspirations for the future of men, cities and society may have been thwarted but the prototypes they created still reflect the light of their creative fervor *Masters of Modern Architecture*, 1971

**The Age of the Masters** Reyner Banham, 1978 **Masters of Modern Architecture. [Photographs, with Introductory and Analytical Notes by John Peter. With Biographies.]** MASTERS., John PETER (Writer on Architecture.), 1958

*Masters of Modern Architecture* Outlet, Outlet Book Company Staff, Rh Value Publishing, 1988-12-12 **Masters of modern architecture; Paul Rudolph**, 1971

**Modern** Jonathan Glancey, 1999 The term modern can be used to describe places as diverse as Fallingwater the Frank Lloyd Wright masterpiece of 1936 and John Pawson's Calvin Klein store of the early nineties. Modernism encompasses many different styles designed over a number of years so what exactly is modern? Author Jonathan Glancey answers this question by first exploring every facet of the modern from architecture to furniture to home design. In a Who's Who of modern design style he then lists all of its greatest practitioners chronologically. From the Art Nouveau style of Gaudi to the classicism of Michael Graves all of the sub styles that fall under the umbrella of modern are finally demystified. Modern ventures beyond the interiors of lavish homes to showcase club and restaurant decor, furniture, product design and textiles. It also features the apartments and homes of the designers and architects themselves offering a rare glimpse into the lives of these celebrated creators. Succinct introductions to each individual designer or architect's mission set the work in the context of related fields such as fashion or graphic design for a view of the real world impact of the modern. With full color illustrations for each designer or architect, Modern is not only an authoritative account of 20th century design but a striking testament to the masters who have shaped contemporary taste. Includes a comprehensive directory of key designers and manufacturers **Age of the masters; a personal view of modern architecture** R.

Banham, 1978 **Master Builders** Peter Blake, 1996-09-03 The story of modern architecture is told here through the lives and works of three men who changed the face of the cities we live in. Le Corbusier gave to modern design a sure and brilliant sense of form. Mies brought an almost Gothic discipline of structure and Wright heralded a new and dramatic concept of space and freedom. Through this triple focus Peter Blake provides a perspective on the entire range of twentieth century

architecture Modern Architecture in Latin America Luis E. Carranza,Fernando Luiz Lara,2015-01-05 Designed as a survey and focused on key examples and movements arranged chronologically from 1903 to 2003 this is the first comprehensive history of modern architecture in Latin America in any language Runner up University Co op Robert W Hamilton Book Award 2015 Modern Architecture in Latin America Art Technology and Utopia is an introductory text on the issues polemics and works that represent the complex processes of political economic and cultural modernization in the twentieth century The number and types of projects varied greatly from country to country but as a whole the region produced a significant body of architecture that has never before been presented in a single volume in any language Modern Architecture in Latin America is the first comprehensive history of this important production Designed as a survey and focused on key examples paradigms arranged chronologically from 1903 to 2003 this volume covers a myriad of countries historical social and political conditions and projects developments that range from small houses to urban plans to architectural movements The book is structured so that it can be read in a variety of ways as a historically developed narrative of modern architecture in Latin America as a country specific chronology or as a treatment of traditions centered on issues of art technology or utopia This structure allows readers to see the development of multiple and parallel branches historical strands of architecture and at times their interconnections across countries The authors provide a critical evaluation of the movements presented in relationship to their overall goals and architectural transformations **Modern Architecture Since the Generation of the Masters** Ernesto N. Rogers,1961 **Oscar Niemeyer** Rupert Spade,

**Modern Masters** Steve Huyton,2017-09-28 More than seventy sensational properties showcase the talents of some of the world's most innovative modernist architects Many of the homes are built on challenging sites reaching levels of engineering sophistication that could only have been executed by the most creative design firms Ranging geographically from Thailand to Turkey New York to Norway and Mexico to South Africa these pristine homes are successful experiments in space volume and building materials They also define luxury affording their owners an unusually high level of comfort and aesthetic pleasure Many of these stunning dwellings have never before appeared in print and each includes a brief description of the location and how the architects solved the puzzle of client and site **History of Modern Architecture** Leonardo Benevolo,1977 A serious and original study of the beginnings and development of modernism in which the pictorial aspects are designed to aid in the communication of the author's closely reasoned formulations Let it be said at once that the format of this work is richly handsome it is a two volume boxed set comprising 844 pages and well over 1 000 high quality illustrations and it reflects throughout its publisher's conviction that good design is an essential not superficial part of bookmaking Beyond that it should be emphasized that this work is not another facile cultural tour of modern architecture It is a serious and original study of the beginnings and development of modernism in which the pictorial aspects are designed to aid in the communication of the author's closely reasoned formulations rather than to gloss over a lack of substantive

content The book is a translation of the third Italian edition published in 1966 Benevolo who is on the faculty of architecture in Venice has earned an international reputation as a historian of architecture and town planning and his publications embrace the span of time from the Renaissance to the foreseeable future One such publication The Origins of Modern Town Planning The MIT Press 1967 may be read as a prelude to the present work as well as an independent contribution Perhaps more than any other architectural historian in our time Benevolo has made a determined effort to place developments in design and planning in their proper social and political settings Indeed the author argues that the development of the modern movement in architecture was determined not by aesthetic formalisms but largely by the social changes that have occurred since about 1760 After the middle of the eighteenth century without the continuity of formal activity being in any way broken indeed while architectural language seems to be acquiring a particular coherence the relations between architect and society began to change radically New material and spiritual needs new ideas and modes of procedure arise both within and beyond the traditional limits and finally they run together to form a new architectural synthesis that is completely different from the old one In this way it is possible to explain the birth of modern architecture which otherwise would seem completely incomprehensible This second volume is concerned with the modern movement proper from 1914 to 1966 The author emphasizes the unity of the movement rejecting the usual treatment that allots to the individual architects separate and unconnected biographical accounts Benevolo remarks at one point When one talks about modern architecture one must bear in mind the fact that it implies not only a new range of forms but also a new way of thinking whose consequences have not yet all been calculated His main concern is to provide a more exact calculation of those consequences

**Modern Architecture** Graham Livesey, 2024-11-15 Modern Architecture The Basics examines technological stylistic socio political and cultural changes that have transformed the history of architecture since the late 18th century Broad definitions of modernity and postmodernity introduce the book which comprises 24 short thematic chapters looking at the concepts behind the development of modern and postmodern architecture These include major historical movements key figures and evolving building typologies There is also an emphasis on the changing city during the 19th and 20th centuries Approaches to representation and its impacts on architecture are studied along with the changing global role of architecture as cultural expression The book introduces new topics including gender race postcolonialism and indigeneity An undaunting contemporary and inclusive account of modern architectural history this is a must read for all students of architecture as well as those outside the discipline approaching the subject for the first time
