## **Material Culture And Technology:**

Material Culture and Technology in Everyday Life Phillip Vannini,2009 Focusing on the technoculture of everyday life this book attempts to zero in on the simplicity and the habitual character of the interaction between humans and material objects which is often assumed or taken for granted Because objects are always meaningful in the pragmatic use to which they are directed the material world of everyday life can be seen as a technoculture of its own one made of behaviors as simple and yet as significant as using a lawnmower or decorating one's body In discussing the unique methodological components of the ethnography of the technoculture of everyday life this book begins a dialogue on how we can examine from the participants perspective the interconnections between social agents their technological material practices their material objects or technics and their social and material environment

**Technology, Tradition and Survival** Richard Tapper,Keith McLachlan,2004-11-23 The contributors address the history originality variety and sophistication of traditional science technology and material culture in the Middle East and Central Asia their influence on the history of Europe and the West and the threat posed by modern Western technologies

*Research in Science and Technology Studies* Shirley Gorenstein,1996-06-25 This volume contains research in science and technology studies It covers topics ranging from the computer as gendered material culture to the use of material culture in Shaker society

**Technological Choices** Pierre Lemonnier,2013-10-15 Technological Choices applies the critical tools of archaeology to the subject of technology and its impact on humankind throughout the ages An examination of the challenges technological innovations present to various cultures Technological Choices asserts that in any society such choices are made on the basis of cultural values and social relations rather than on the inherent benefits in technology itself Of course this revolutionary viewpoint has critical implications for contemporary Western societies Based on case studies covering a wide range of chronologies and geographies Technological Choices moves rapidly from Neolithic Europe to the modern industrial age stopping on the way to examine the tribes of Papua New Guinea rural Indian and North African societies as well as several European peasant communities The techniques studied range from the manufacture of stone implements to the development of high tech transportation devices With its breadth of subject matter and multidisciplinary approach Technological Choices offers new insight into the interrelationship between technology and society Also unprecedented is the book's emphasis on the functional aspects of material culture

**Science, Technologies and Material Culture in the History of Education** Heather Ellis,2020-05-18 Developed out of a 2015 conference of the History of Education Society UK this book explores the interconnections between the histories of science technologies and material culture and the history of education The contributions express a shared concern over the extent to which the history of science and technology and the history of education are too frequently written about separately from each other despite being intimately connected This state of affairs they suggest is linked to broader divisions in the history of knowledge which has for many years been carved up into sections

reflective of the academic subject divisions that structure modern universities and higher education in the West. Most noticeably this has occurred with the history of science but more recently the history of humanities has been divided as well. The contributions to this volume demonstrate the diversity and originality of research currently being conducted into the connections between the history of science and the history of education. The importance of objects in teaching and their value as pedagogical tools emerges as a particularly significant area of research located at the intersection between the two fields of enquiry. Indeed it is the materiality of education a focus on the use of objects pedagogical practices and particular spaces which seems to offer some of the most promising avenues for exploring further the relationship between the histories of science and education. Globalization accelerated through trade routes like the Silk Road connecting distant civilizations and promoting the exchange of goods ideas and technologies. This exchange enriched cultures and sparked innovation. In the modern era globalization intensified with digital technologies enabling instantaneous communication and global supply chains. The topics included in this book on history of technology material culture and globalization are of utmost significance and bound to provide incredible insights to readers. **People and Things** James M. Skibo,Michael Brian Schiffer,2008-03-12

The study of the human made world whether it is called artifacts material culture or technology has burgeoned across the academy. Archaeologists have for centuries led the way and today offer investigators myriad programs and conceptual frameworks for engaging the things ordinary and extraordinary of everyday life. This book is an attempt by practitioners of one program Behavioral Archaeology to furnish between two covers some of our basic principles heuristic tools and illustrative case studies. Our greater purpose however is to engage the ideas of two competing programs agency practice and evolution in hopes of initiating a dialog. We are convinced that there is enough overlap in goals interests and conceptions among these programs to warrant guarded optimism that a more encompassing more coherent framework for studying the material world can result from a concerted effort to forge a higher level synthesis. However in engaging agency practice and evolution in Chap 2 we are not reticent to point out conflicts between Behavioral Archaeology and these programs. This book

will appeal to archaeologists and anthropologists as well as historians sociologists and philosophers of technology Those who study science technology society interactions may also encounter useful ideas Finally this book is suitable for upper division and graduate courses on anthropological theory archaeological theory and the study of technology **Material Culture and Technology** Robert F. Tarikhu Farrar,2020-01-20

The idea of an inherent backwardness of technology and material culture in early sub Saharan Africa is a persistent and tenacious myth in the scholarly and popular imagination Due to the emergence of the field of African studies and the upsurge in historical and archaeological research in recent decades the stridency of this myth has weakened and the overtly racist content of arguments mustered in its defense have tended to disappear But more important are transformations in social political and cultural consciousness which have worked to reshape conceptualizations of African peoples their histories and their cultures Precolonial African Material Culture offers a thorough challenge to the myth of technological backwardness V Tarikhu Farrar revisits the early technology of sub Saharan Africa as revealed by recent research and reconsiders long possessed primary historical sources He then explores the ways that indigenous African technologies have influenced the world beyond the African continent **The**
