Math Art Activities:

Math Art Zachary J. Brewer, 2010-07-06 Math Art is a supplemental arts integrated mathematics curriculum. The purpose of Math Art is to help teachers introduce, reinforce or expand upon the topics their students are required to learn. Furthermore by blending the subjects of mathematics and art Math Art is capable of motivating students, decreasing classroom discipline problems, increasing student retention of knowledge and assisting the instruction of visual learners, kinesthetic learners and English Language Learners. Each of the book's math activities require students to create an aesthetically pleasing project that focuses on a fundamental or broad mathematical topic: perimeter, volume, symmetry, angles, etc.

Math Art Fun Robin Ward, 2011 Math Goggles is a collection of field tested activities for children that integrate mathematics into the world of the visual arts. Serving as the focal point for each mathematics activity is the work of a famous modern artist: Jackson Pollock, Andy Warhol, Georgia O'Keeffe and many more. After learning brief biographical and anecdotal information about the artist, the reader engages in an exploration of the mathematics embedded in the artwork by creating the featured piece of artwork in the spirit of the artist. Step by step instructions accompanied by color images of the artistic masterpieces as well as actual student work aid the reader in visualizing and understanding how to create the art in each activity. As the reader creates each masterpiece mimicking the great masters, they simultaneously hone their estimation, counting, measurement and number sense skills while noticing, creating and describing shapes and patterns and experimenting with symmetry and probability.
