200 Math Brain Building Problems - Grade 3

CreateSpace Independent Publishing Platform, 2017-03-23 Twenty first century kids would need much more than the traditional skills of reading, writing and computation to prepare for the 21st century careers. The attribute that will set them apart is not just their knowledge but what they can do with it. Thinking, wondering and questioning is the only survival skills that will help children to prepare for future. Attributes such as problem solving, reasoning and pattern recognition, creative thinking that show that a student can

understand interpret and use the information available would be an impeccable skill set to have Thinking skills are not something that one is innately born with thinking skills can be and must be nurtured taught and learnt with systemic approach and material While a child may get great theory and knowledge lessons but to be good at critical thinking skills it is necessary to internalise the theoretical principles so that we can actually apply them in daily life When we start thinking about the knowledge that we have that s when our knowledge becomes wisdom For example we might study in the classroom about how to swim and learn about all the basic theory about what makes a good swimmer but unless we can apply and explore such theoretical knowledge through constant practice we might not actually be able to swim This book is a good start at the journey of Thinking with your child It aims to supplement and extend children s Mathematical knowledge The fun and engaging Math problems in the book would stretch child s thinking and provide great opportunities for applying the Math concepts learnt at school It s time to not only know your Math but to THINK with it *Make it Simpler* Carol Meyer, Tom Sallee, 1983 Over fifty math problems presented in three levels of difficulty An innovative approach that takes less than 15 minutes a day to apply and can be used in any mathematics program *Math Problem Solving* James L.
