**The Contributing Factors of Cultural Learning Styles in the Development of a Multicultural Classroom** Andrew Michael Stoltzman, 2006 My research and subsequent paper is a result of a noticeable learning gap in multi cultural classrooms in the U S that primarily emphasize the learning styles of the American education system but not the learning styles of other cultures represented in the classrooms Student in our own ESL department at Century College often question how and why instructors present the material and tests This led me to realize that there was probably something in the students backgrounds that was causing them to question and resist the American teachers ways of presenting their curriculum I chose to investigate the learning styles of six cultures including our own I questioned and noted what my community college peers were saying plus what I observed in my own classes and I researched professional journals and books to learn more about the subject I was amazed by the wide range of methods that are used to present information to students In synthesizing the information that I gleaned from my research and my peers I discovered many interesting things about the six cultures Cooperative group work and being allowed to be in control of learning is important to Americans However I discovered that the Japanese students tend to value the process of finding an answer and they reject being singled out or standing out from the group The Hmong have typically learned through storytelling and observation Group process and consensus are important to the Mexicans and the Ukrainians focus on memorization and system Somalis tend to be poetic and involved in role playing Because of the wide diversity in learning styles that are typically found in the Century College ESL classes I created a unit plan for an intermediate ESL reading class It incorporates aspects of these five cultural learning styles while guiding the students toward the American learning style which they will need to be familiar with once they enter other college classes While the unit plan was developed to teach metaphors and similes it is important for the reader to be aware that this kind of planning and teaching is definitely not limited to ESL and can be adapted to many other lessons and courses Students in developmental reading writing and mathematics would find this process very comforting and useful However before effective learning can happen in the classroom teachers need to know and appreciate the different cultural learning styles that their second language learners bring with them to the American classrooms and be willing to meet them where they are

*Importance of Learning Styles* Ronald R. Sims, Serbrenia J. Sims, 1995-05-23 This book provides a timely review of learning style research. It examines those approaches that purport to promote effective learning. It affirms the need for instructors and trainers to recognize the importance of individual learning differences and to use methods that help create a learning climate which increases the potential learning for all students or trainees regardless of their preferred way of learning. The ability to understand and to teach to the various learning styles of students is essential to improving the effectiveness of college level education. In this book Sims and Sims bring together significant research to aid academics and organizational trainers in understanding and applying learning style research and knowledge to program course and class development. Beyond Access: Methods and Models for Increasing Retention and Learning Success Among Minority Students Steven Rives Aragon, 2000 This issue presents practical models, alternative approaches and new strategies for creating effective cross cultural courses that foster higher retention and learning success for minority students. Arguing that minority students represent various cultures and socioeconomic backgrounds, the authors discuss a wide range of issues for educators in this field including culturally specific learning styles, work based mentoring programs and the role of the non minority instructor in a minority environment. Articles critically examine traditional methods in admissions, assessments, placement measures and learning evaluation that are failing to address cultural diversity and offer alternatives such as a theoretical model for measuring student learning style incorporating components of motivation and engagement for inclusion with the traditional cognitive perspective. They also present a case study of one campus's efforts to create a more inclusive climate. With demographic projections indicating dramatic increases in minority student population in the following decades, the authors assert that educational programs must now develop a broader curricula that includes multicultural and multi linguistic information. In this issue they have provided a valuable resource for institutions meeting that challenge. This is the 112th issue of the Jossey Bass series *New Directions for Community Colleges*. *MultiCultural Review*, 2005
