America reacts to Edward Snowden's leaks about NSA surveillance *American Privacy* offers a timely look at our national
experience with the right to privacy The history of America is the history of the right to privacy writes Frederick S Lane in
this vivid and penetrating exploration of our most hotly debated constitutional right From Governor William Bradford
opening colonists mail bound for England to President George W Bush's expansive domestic wiretapping the motivations
behind government surveillance have changed little despite rapid advances in communications technology Yet all too often
American citizens have been their own worst enemies when it comes to protecting privacy compliantly forgoing civil liberties
in extreme times of war as well as for everyday consumer conveniences Each of us now contributes to an ever evolving
electronic dossier of online shopping sprees photo albums health records and political contributions accessible to almost
anyone who cares to look In a digitized world where data lives forever Lane urges us to consider whether privacy is even a
possibility How did we arrive at this breaking point *American Privacy* traces the lineage of cultural norms and legal mandates
that have swirled around the Fourth Amendment since its adoption In 1873 the introduction of postcards split American
opinion of public propriety Over a century later Twitter takes its place on the spectrum of human connection Between these
two nodes Anthony Comstock waged a moral crusade against obscene literature George Orwell penned 1984 Joseph
McCarthy hunted Communists and perverts President Richard Nixon surveilled himself right out of office and the Supreme
Court of the United States issued its most influential legal opinions concerning the right to privacy to date Captured here
these historic snapshots add up to a lively narration of privacy's champions and challengers Legally technologically and
historically grounded *American Privacy* concludes with a call for Congress to recognize how innovation and infringement go
hand in hand and a challenge to citizens to protect privacy before it is lost completely *The Software Catalog. Business*
