A Board Game Education Jeffrey P. Hinebaugh, 2009-07-16 A Board Game Education is an entertaining and valuable resource for parents teachers educators and anyone who appreciates the fun and entertainment provided by classic traditional board games The book provides an informative analysis of how classic board games that everyone has played_and probably owns_are not only great family entertainment but also develop core educational skills that have been proven to lead to academic achievement Through A Board Game Education readers learn a bit of the fascinating history trivia and little known facts regarding the most loved board games of all time i e how Monopoly was used by WWII POWs to escape At the same time Hinebaugh identifies the distinct educational skills developed by each of these games and explores in detail how the play of these games cultivates such skills A Board Game Education also provides

valuable suggestions about how to modify and vary these classic board games to specifically enhance additional core educational skills and concepts Who would have thought that Candy Land could be modified into a strategy game and Chutes and Ladders could be used to teach algebraic equations and advanced math **Children's Books in Print, 2007** ,2006

Excellence Through Equity Alan M. Blankstein,Pedro Noguera,Lorena Kelly,2016-02-26 Excellence Through Equity is an inspiring look at how real world educators are creating schools where all students are able to thrive In these schools educators understand that equity is not about treating all children the same They are deeply committed to ensuring that each student receives what he or she individually needs to develop their full potential and succeed To help educators with what can at times be a difficult and challenging journey Blankstein and Noguera frame the book with five guiding principles of Courageous Leadership Getting to your core Making organizational meaning Ensuring constancy and consistency of purpose Facing the facts and your fears Building sustainable relationships They further emphasize that the practices are grounded in three important areas of research that are too often disregarded 1 child development 2 neuroscience and 3 environmental influences on child development and learning You ll hear from Carol Corbett Burris Michael Fullan Marcus J Newsome Paul Reville Susan Szachowicz and other bold practitioners and visionary thinkers who share compelling and actionable ideas strategies and experiences for closing the achievement gap in your classrooms and school Ensuring that all students receive an education that cultivates their talents and potential is in all our common interest As Andy Hargreaves writes in the coda The opportunity for all Americans is to articulate and believe in an inspiring vision of educational change that is about what the next generation of America and Americans should become not about a target or ranking that the nation should attain
