**Bibliographic Guide to Technology** New York Public Library. Research Libraries,1978      Progress in Nitrogen Ceramics F.L. Riley,2012-12-06 The first NATO Advanced Study Institute on Nitrogen Ceramics held in 1976 at Canterbury came at a particularly significant moment in the development of this subject The five year period 1971 75 had been an especially fruitful one in very many respects for work in the areas of covalent materials in general and of the nitrides in particular The Institute was therefore able to capture fully the spirit of excitement and adventure engendered by the outputs of numerous national research programmes as well as those of many smaller research groups concerning ceramics potentially suitable for applications in a high temperature engineering context It reflected accurately the state of knowledge with respect to the basic science the powder technology and the properties of materials based on silicon nitride and associated systems The Proceedings of the Institute thus provided a good record for workers already in the field and a useful textbook for newcomers to the subject of nitrogen ceramics The Canterbury Advanced Study Institute had a valuable educational and social function in bringing together for two weeks a large proportion of those workers most closely involved at that time with the nitrogen ceramics The atmosphere of this meeting providing both intensive discussions and informal contacts made a lasting impression on the participants and inevitably the question was raised of whether and when a second Advanced Study Institute might be held on this subject      *Mechanical and Corrosion Properties* ,1979      **Bibliographic Guide to**
